

Computer architecture

UNIT VOCABULARY

Computer	
Process	
Hardware	
Software	
Program	
Instruction	
Input	
Output	
Devices	
Store	
Data bus	
Address bus	
Control bus	
Main memory	
Storage units	
Power supply	
Expansion cards	
Port	
RAM memory	
Main board	
Microprocessor	
Chipset	
BIOS	
Connecting elements	
Decode	
Arithmetic/Logic Unit	
Control Unit	
Register	
System	
Data size	
Transistor	
Random Access	
Keyboard	
Central processing	
bit	

1.- What is the name of this element?

2.- How these elements are called?

3. Complete the table according to the definitions

The physical, tangible parts of a computer	
Series of instructions	
Device that enters data	
Programs and data	
Device that shows data	
It stores the Information and programs	
It processes information	
The smaller data	
Transmits address	
Executes program commands.
