

On the cover a microdrone md4-1000 as it is used in geomatics for photogrammetry and remote sensing. The October issue of *GIM International* is, as always, dedicated to Intergeo. One of the trending topics at last year's edition of the world's largest geomatics tradeshow was UAVs. UAVs were definitely not just a hype, as we will see at this year's edition. Our extensive Intergeo preview starts on page 46.
