

Statistics & Risk Modeling

Volume 30 · Issue 3 · 2013

| | |
|--|-----|
| <i>K. Shimizu</i> The bootstrap does not always work for heteroscedastic models | 189 |
| <i>M. Burkschat, U. Kamps, M. Kateri</i> Estimating scale parameters under an order statistics prior | 205 |
| <i>X. Chen, L. Wang</i> Conditional L_1 estimation for random coefficient integer-valued autoregressive processes . . | 221 |
| <i>S. Christensen, A. Irle</i> American Options with guarantee – A class of two-sided stopping problems | 237 |
| <i>B. Roorda, J. M. Schumacher</i> Membership conditions for consistent families of monetary valuations | 255 |
