

# TECHNOMETRICS

Volume 57, Number 1, February 2015

<b>Nonparametric Variable Transformation in Sufficient Dimension Reduction</b> Qing Mai and Hui Zou	1	<b>Model-Based Sampling Design for Multivariate Geostatistics</b> Jie Li and Dale L. Zimmerman	75
<b>Simultaneous Envelopes for Multivariate Linear Regression</b> R. Dennis Cook and Xin Zhang	11	<b>Geodesic Gaussian Processes for the Parametric Reconstruction of a Free-Form Surface</b> Enrique del Castillo, Bianca M. Colosimo, and Sam Davanloo Tajbakhsh	87
<b>Dynamic Retrospective Regression for Functional Data</b> Daniel Gervini	26	<b>Inverse Gaussian Processes With Random Effects and Explanatory Variables for Degradation Data</b> Chien-Yu Peng	100
<b>Analysis of Computer Experiments With Functional Response</b> Ying Hung, V. Roshan Joseph, and Shreyes N. Melkote	35	<b>Statistical Inference for Power-Law Process With Competing Risks</b> Anupap Somboonsavatdee and Ananda Sen	112
<b>Physical Experimental Design in Support of Computer Model Development</b> Max D. Morris	45	<b>Solving the MEG Inverse Problem: A Robust Two-Way Regularization Method</b> Siva Tian, Jianhua Z. Huang, and Haipeng Shen	123
<b>Approximate Model Spaces for Model-Robust Experiment Design</b> Byran J. Smucker and Nathan M. Drew	54	<b>Book Reviews</b>	138
<b>Sequential Exploration of Complex Surfaces Using Minimum Energy Designs</b> V. Roshan Joseph, Tirthankar Dasgupta, Rui Tuo, and C. F. Jeff Wu	64
