

TECHNOMETRICS

Volume 58, Number 2, May 2016

- Scaled Predictor Envelopes and Partial Least-Squares Regression**
R. Dennis Cook and Zhihua Su 155
- Bayesian Additive Regression Tree Calibration of Complex High-Dimensional Computer Models**
M. T. Pratola and D. M. Higdon 166
- Monotonic Quantile Regression With Bernstein Polynomials for Stochastic Simulation**
Matthias H. Y. Tan 180
- A Change-Point Approach for Phase-I Analysis in Multivariate Profile Monitoring and Diagnosis**
Kamran Paynabar, Changliang Zou,
and Peihua Qiu 191
- Bayesian Detection of Changepoints in Finite-State Markov Chains for Multiple Sequences**
Petter Arnesen, Tracy Holsclaw,
and Padhraic Smyth 205
- Bayesian Inference for a New Class of Distributions on Equivalence Classes of Three-Dimensional Orientations With Applications to Materials Science**
Chuanlong Du, Daniel J. Nordman,
and Stephen B. Vardeman 214
- Prior-Free Probabilistic Prediction of Future Observations**
Ryan Martin and Rama T. Lingham 225
- Quantifying Uncertainty in Lumber Grading and Strength Prediction: A Bayesian Approach**
Samuel W. K. Wong, Conroy Lum, Lang Wu
and James V. Zidek 236
- Optimum Allocation Rule for Accelerated Degradation Tests With a Class of Exponential-Dispersion Degradation Models**
Sheng-Tsaing Tseng and I-Chen Lee 244
- Comparing the Slack-Variable Mixture Model With Other Alternatives**
Lulu Kang, Javier Cruz Salgado,
and William A. Brennehan 255
- Optimal Experimental Designs in the Flow Rate of Particles**
Mariano Amo-Salas, Elvira Delgado-Márquez,
and Jesús López-Fidalgo 269
- Book Reviews** 277
- Nominations Sought for 2016 William G. Hunter Award** 282
