**CONTENTS****Volume 59 Number 3 2017**

Additive Gaussian Process for Computer Models With Qualitative and Quantitative Factors <i>X. Deng, C. Devon Lin, K.-W. Liu, and R. K. Rowe</i>	283
Bayesian Local Kriging <i>Luc Pronzato and Maria-João Rendas</i>	293
Selecting an Orthogonal or Nonorthogonal Two-Level Design for Screening <i>Robert W. Mee, Eric D. Schoen, and David J. Edwards</i>	305
Effective Design-Based Model Selection for Definitive Screening Designs <i>Bradley Jones and Christopher J. Nachtsheim</i>	319
An Exact Test of Fit for the Gaussian Linear Model Using Optimal Nonbipartite Matching <i>Samuel D. Pimentel, Dylan S. Small, and Paul R. Rosenbaum</i>	330
Modeling Regression Quantile Process Using Monotone B-Splines <i>Yuan Yuan, Nan Chen, and Shiyu Zhou</i>	338
Multiple Testing in Regression Models With Applications to Fault Diagnosis in the Big Data Era <i>Ching-Kang Ing, Tze Leung Lai, Milan Shen, KaWai Tsang, and Shu-Hui Yu</i>	351
A Geometric Approach to Archetypal Analysis and Nonnegative Matrix Factorization <i>Anil Damle and Yuekai Sun</i>	361
Comparing the Reliability of Related Populations With the Probability of Agreement <i>Nathaniel T. Stevens and Christine M. Anderson-Cook</i>	371
A Generalized Quasi-MMSE Controller for Run-to-Run Dynamic Models <i>Sheng-Tsaing Tseng and Pei-Yu Chen</i>	381
Quantifying Nanoparticle Mixing State to Account for Both Location and Size Effects <i>Ling Dong, Xiaodong Li, Dan Yu, Hui Zhang, Zhong Zhang, Yanjun Qian, and Yu Ding</i>	391
<b>Book Reviews</b>	404
