

CONTENTS

Volume 59 Number 4 2017

<i>Technometrics</i> 2017 Editor's Report <i>Daniel W. Apley</i>	413
Accelerating Large-Scale Statistical Computation With the GOEM Algorithm <i>Xiao Nie, Jared Huling, and Peter Z. G. Qian</i>	416
Tensor Envelope Partial Least-Squares Regression <i>Xin Zhang and Lexin Li</i>	426
A Coordinate-Descent-Based Approach to Solving the Sparse Group Elastic Net <i>Daniel V. Samarov, David Allen, Jeeseong Hwang, Young Jong Lee, and Maritoni Litorja</i>	437
Split-Plot and Multi-Stratum Designs for Statistical Inference <i>Luzia A. Trinca and Steven G. Gilmour</i>	446
Bayesian Design of Experiments Using Approximate Coordinate Exchange <i>Antony M. Overstall and David C. Woods</i>	458
Robust Parameter Designs in Computer Experiments Using Stochastic Approximation <i>Weijie Shen</i>	471
Phase I Distribution-Free Analysis of Multivariate Data <i>Giovanna Capizzi and Guido Masarotto</i>	484
Statistical Process Control for Latent Quality Characteristics Using the Up-and-Down Test <i>Dongdong Xiang, Fugee Tsung, and Xiaolong Pu</i>	496
A Vine Copula Model for Predicting the Effectiveness of Cyber Defense Early-Warning <i>Maochao Xu, Lei Hua, and Shouhuai Xu</i>	508
Hierarchical Spatially Varying Coefficient Process Model <i>Heeyoung Kim and Jaehwan Lee</i>	521
Minimum Distance Estimation for the Generalized Pareto Distribution <i>Piao Chen, Zhi-Sheng Ye, and Xingqiu Zhao</i>	528
Book Reviews	542
The 2016 <i>Technometrics</i> Prizes	552
2016 Ziegel Award Announcement	555
Technometrics Editorial Collaborators	556
