

CONTENTS

Volume 61 Number 2 2019

Variable Selection for the Prediction of $C[0, 1]$ -Valued Autoregressive Processes using Reproducing Kernel Hilbert Spaces
Beatriz Bueno-Larraz and Johannes Klepsch 139

Assessing Tuning Parameter Selection Variability in Penalized Regression
Wenhao Hu, Eric B. Laber, Clay Barker, and Leonard A. Stefanski 154

On Data Integration Problems With Manifolds
Mark V. Culp, Kenneth J. Ryan, Prithish Banerjee, and Michael Morehead 165

Convex Bidirectional Large Margin Classifiers
Zhengling Qi and Yufeng Liu 176

Inference for Errors-in-Variables Models in the Presence of Systematic Errors with an Application to a Satellite Remote Sensing Campaign
Bohai Zhang, Noel Cressie, and Debra Wunch 187

Gaussian Process Modeling Using the Principle of Superposition
Matthias H. Y. Tan and Guilin Li 202

Constructing Two-Level Designs by Concatenation of Strength-3 Orthogonal Arrays
Alan R. Vazquez, Peter Goos, and Eric D. Schoen 219

Bayesian Analysis of Accumulated Damage Models in Lumber Reliability
Chun-Hao Yang, James V. Zidek, and Samuel W. K. Wong 233

Material Degradation Modeling and Failure Prediction Using Microstructure Images
Wujun Si, Qingyu Yang, and Xin Wu 246

Efficient Integration of Sufficient Dimension Reduction and Prediction in Discriminant Analysis
Xin Zhang and Qing Mai 259

Book Reviews 273

Correction 281
