

CONTENTS

Volume61 Number4 November 2019

Empirical Dynamic Quantiles for Visualization of High-Dimensional Time Series
Daniel Peña, Ruey S. Tsay, and Ruben Zamar 429

A Decomposition of Total Variation Depth for Understanding Functional Outliers
Huang Huang and Ying Sun 445

MacroPCA: An All-in-One PCA Method Allowing for Missing Values as Well as Cellwise and Rowwise Outliers
Mia Hubert, Peter J. Rousseeuw, and Wannes Van den Bossche 459

Profile Extrema for Visualizing and Quantifying Uncertainties on Excursion Regions: Application to Coastal Flooding
Dario Azzimonti, David Ginsbourger, Jérémy Rohmer, and Déborah Idier 474

Spatial Signal Detection Using Continuous Shrinkage Priors
An-Ting Jhuang, Montserrat Fuentes, Jacob L Jones, Giovanni Esteves, Chris M Fancher, Marscha/1 Furman, and Brian J. Reich 494

Mixture of Regression Models for Large Spatial Datasets
Karen Kazor and Amanda S. Hering 507

Central Composite Experimental Designs for Multiple Responses With Different Models
Wilmina M. Marget and Max D. Morris 524

Optimal Experimental Design in the Presence of Nested Factors
Peter Goos and Bradley Jones 533

Analysis-of-Marginal-Tail-Means (ATM): A Robust Method for Discrete Black-Box Optimization
Simon Mak and C. F. Jeff Wu 545

Book Reviews 560
