ORIGINAL PAPERS

Permutation tests using least distance estimator in the multivariate regression model
S. Sohn · B.C. Jung · M. Jhun 191

A boosting method with asymmetric mislabeling probabilities which depend on covariates
K. Hayashi 203

On the choice of a noninformative prior for Bayesian inference of discretized normal observations
C. Elster · I. Lira 219

A new Bayesian procedure for testing point null hypotheses
Y. Yin 237

Specification tests for the response distribution in generalized linear models
B. Klar · S.G. Meintanis 251

Efficient construction of a smooth nonparametric family of empirical distributions and calculation of bootstrap likelihood
B.J. Worton 269

Empirical properties of forecasts with the functional autoregressive model
D. Didericksen · P. Kokoszka · X. Zhang 285

Improved omnibus test statistic for normality
S. Nakagawa · H. Hashiguchi · N. Niki 299

Multi-regime models for nonlinear nonstationary time series
F. Battaglia · M.K. Protopapas 319

Testing for no effect via splines
C.-S. Li 343

Bayesian analysis of quantile regression for censored dynamic panel data
G. Kobayashi · H. Kozumi 359
