ORIGINAL PAPERS

Discriminant analysis for compositional data and robust parameter estimation
P. Filzmoser · K. Hron · M. Templ 585

Sparse principal components by semi-partition clustering
D.G. Enki · N.T. Trendafilov 605

Near-exact distributions for the likelihood ratio test statistic to test equality of several variance-covariance matrices in elliptically contoured distributions
C.A. Coelho · F.J. Marques 627

Asymptotic expansions for the ability estimator in item response theory
H. Ogasawara 661

Estimating value at risk with semiparametric support vector quantile regression
J. Shim · Y. Kim · J. Lee · C. Hwang 685

Constrained EM algorithm with projection method
K. Takai 701

Flexible scan statistic test to detect disease clusters in hierarchical trees
M.O. Prates · R.M. Assunção · M.A. Costa 715

Likelihood ratio gradient estimation for Meixner distribution and Lévy processes
R. Kawai 739

Density estimation and comparison with a penalized mixture approach
C. Schellhase · G. Kauermann 757

Hybrid bootstrap aided unit root testing
C. Jentsch · J.-P. Kreiss · P. Mantalos · E. Paparoditis 779

SHORT NOTE

A note on adding and deleting edges in hierarchical log-linear models
D. Edwards 799
