## ORIGINAL PAPERS

**Monte Carlo maximum likelihood circle fitting using circular density functions**  
U.J. Lund · 393

**Testing linearity in semi-parametric functional data analysis**  
G. Aneiros-Pérez · P. Vieu · 413

**Asymptotics for spectral regularization estimators in statistical inverse problems**  
N. Bissantz · H. Holzmann · 435

**Ranking ranks: a ranking algorithm for bootstrapping from the empirical copula**  
T. Blumentritt · O. Grothe · 455

**Sequential monitoring of a Bernoulli sequence when the pre-change parameter is unknown**  
G.J. Ross · D.K. Tasoulis · N.M. Adams · 463

**Using wiki to build an e-learning system in statistics in the Arabic language**  
T. Ahmad · W. Härdle · S. Klinke · S. Alawadhi · 481

**Lag weighted lasso for time series model**  
H. Park · F. Sakaori · 493

**On maximization of the likelihood for the generalized gamma distribution**  
A. Noufaily · M.C. Jones · 505

**Variable selection for market basket analysis**  
K. Dippold · H. Hruschka · 519

**Monitoring  $k$ th order runs in binary processes**  
C.H. Weiß · 541

**Erratum** · 563

**Goodness-of-fit indices for partial least squares path modeling**  
J. Henseler · M. Sarstedt · 565

Springer

# Computational Statistics

Volume 28 · Number 2 · 2013

(Contents continued)

**Regression analysis of interval censored and doubly truncated data with linear transformation models**

P. Shen 581

**Latent variable models for ordinal data by using the adaptive quadrature approximation**

S. Cagnone · P. Monari 597

**Efficient identification of independence networks using mutual information**

D. Bacciu · T.A. Etchells · P.J.G. Lisboa · J. Whittaker 621

**The linear combinations of biomarkers which maximize the partial area under the ROC curves**

M.-J. Hsu · H.-M. Hsueh 647

**Efficient power computation for  $r$  out of  $m$  runs rules schemes**

R. Mehmood · M. Riaz · R.J.M.M. Does 667

**Using mixture of Gamma distributions for Bayesian analysis in an M/G/1 queue with optional second service**

A. Mohammadi · M.R. Salehi-Rad · E.C. Wit 683

**Estimating critical values for testing the i.i.d. in standardized residuals from GARCH models in finite samples**

J.V. Pérez-Rodríguez · J. Andrada-Félix 701

**Improvement in finite-sample properties of GMM-based Wald tests**

Q. Chen · Y. Ren 735

**An efficient ECM algorithm for maximum likelihood estimation in mixtures of  $t$ -factor analyzers**

W.-L. Wang · T.-I. Lin 751

**Partial least squares classification for high dimensional data using the PCOUT algorithm**

A. Turkmen · N. Billor 771

**Iterative factor clustering of binary data**

A. Iodice D'Enza · F. Palumbo 789

**On estimation of measurement error models with replication under heavy-tailed distributions**

J.-G. Lin · C.-Z. Cao 809

**MCMC using Markov bases for computing  $p$ -values in decomposable log-linear models**

M. Kuroda · H. Hashiguchi · S. Nakagawa · Z. Geng 831

**Compression-based distance between string data and its application to literary work classification based on authorship**

M. Ishikawa · H. Kawakami 851

**Studying the bandwidth in  $k$ -sample smooth tests**

P. Martínez-Cambor · J. de Uña-Álvarez 875
