

BIOMETRIKA VOL. 99, NO. 1

CONTENTS

	PAGE
STIGLER, S. M. Studies in the history of probability and statistics, L: Karl Pearson and the Rule of Three	1
WANG, H. Factor profiled sure independence screening.	15
MAI, Q., ZOU, H. and YUAN, M. A direct approach to sparse discriminant analysis in ultra-high dimensions	29
EASTOE, E. F. and TAWN, J. A. Modelling the distribution of the cluster maxima of exceedances of subasymptotic thresholds	43
HARRISON, M. T. Conservative hypothesis tests and confidence intervals using importance sampling	57
MUKERJEE, R. and TANG, B. Optimal fractions of two-level factorials under a baseline parameterization	71
KIM, J. K. and RAO, J. N. K. Combining data from two independent surveys: a model-assisted approach	85
AZRIEL, D., MANDEL, M. and RINOTT, Y. Optimal allocation to maximize the power of two-sample tests for binary response	101
VANDERWEELE, T. J. and TAN, Z. Directed acyclic graphs with edge-specific bounds	115
KIM, Y., JAMES, L. and WEISSBACH, R. Bayesian analysis of multistate event history data: beta-Dirichlet process prior	127
ZHANG, W. and LENG, C. A moving average Cholesky factor model in covariance modelling for longitudinal data	141
YI, G. Y., MA, Y. and CARROLL, R. J. A functional generalized method of moments approach for longitudinal studies with missing responses and covariate measurement error	151
ZENG, D., CHEN, Q., CHEN, M.-H., IBRAHIM, J. G. and AMGEN RESEARCH GROUP Estimating treatment effects with treatment switching via semicompeting risks models: an application to a colorectal cancer study	167
SUN, L., SONG, X. and ZHANG, Z. Mean residual life models with time-dependent coefficients under right censoring	185
HUANG, C.-Y., QIN, J. and FOLLMANN, D. A. A maximum pseudo-profile likelihood estimator for the Cox model under length-biased sampling	199
LUO, X. and TSAI, W. Y. A proportional likelihood ratio model	211
MISCELLANEA	
HUANG, A. and RATHOUZ, P. J. Proportional likelihood ratio models for mean regression	223
FLETCHER, D. J. Estimating overdispersion when fitting a generalized linear model to sparse data	230
FERRARI, D. and LA VECCHIA, D. On robust estimation via pseudo-additive information	238
LIU, A., LIU, C., ZHANG, Z. and ALBERT, P. S. Optimality of group testing in the presence of misclassification	245
