

BIOMETRIKA VOL. 101, NO. 1

CONTENTS

	PAGE
WADSWORTH, J. L. and TAWN, J. A. Efficient inference for spatial extreme value processes associated to log-Gaussian random functions	1
WELLER, G. B. and COOLEY, D. A sum characterization of hidden regular variation with likelihood inference via expectation-maximization	17
JANSEN, M. Information criteria for variable selection under sparsity	37
FAN, Y. and LV, J. Asymptotic properties for combined L_1 and concave regularization	57
XIONG, S. Better subset regression	71
VOORMAN, A., SHOJAIE, A. and WITTEN, D. Graph estimation with joint additive models	85
ZHANG, T. and ZOU, H. Sparse precision matrix estimation via lasso penalized D-trace loss	103
VOGT, M. and LINTON, O. Nonparametric estimation of a periodic sequence in the presence of a smooth trend	121
KRAUS, A. and PANARETOS, V. M. Frequentist estimation of an epidemic's spreading potential when observations are scarce	141
LIU, J., GELMAN, A., HILL, J., SU, Y.-S. and KROPKO, J. On the stationary distribution of iterative imputations	155
SKRONDAL, A. and RABE-HESKETH, S. Protective estimation of mixed-effects logistic regression when data are not missing at random	175
BYRNE, S. P. J. and DAWID, A. P. Retrospective-prospective symmetry in the likelihood and Bayesian analysis of case-control studies	189
ZHANG, X., ZOU, G. and LIANG, H. Model averaging and weight choice in linear mixed-effects models	205
PETERS, J. and BÜHLMANN, P. Identifiability of Gaussian structural equation models with equal error variances	219
MISCELLANEA	
ZOU, C., PENG, L., FENG, L. and WANG, Z. Multivariate sign-based high-dimensional tests for sphericity	229
VANSTEELENDT, S., MARTINUSSEN, T. and TCHETGEN TCHETGEN, E. J. On adjustment for auxiliary covariates in additive hazard models for the analysis of randomized experiments	237
HEINRICH, C. The mode functional is not elicitable	245
AMENDMENTS AND CORRECTIONS	252
