

THE AMERICAN STATISTICIAN

Published by the American Statistical Association
Volume 77, Number 3, August 2023

GENERAL

- Statistical Guidance to Authors at Top-Ranked Journals across Scientific Disciplines
Tom E. Hardwicke, Maia Salholz-Hillel, Mario Malički, Dénes Szűcs, Theiss Bendixen, and John P. A. Ioannidis 239
- Bayes Factors and Posterior Estimation: Two Sides of the Very Same Coin
Harlan Campbell and Paul Gustafson 248
- Mixture of Networks for Clustering Categorical Data: A Penalized Composite Likelihood Approach
Jangsun Baek and Jeong-Soo Park 259
- Quantifying the Inspection Paradox with Random Time
Diana Rauwolf and Udo Kamps 274
- Selection Criterion of Working Correlation Structure for Spatially Correlated Data
Marcelo dos Santos, Fernanda De Bastiani, Miguel A. Uribe-Opazo, and Manuel Galea 283
- Bayesian Log-Rank Test
Jiaqi Gu, Yan Zhang, and Guosheng Yin 292

SHORT TECHNICAL NOTE

- Hitting a Prime in 2.43 Dice Rolls (On Average)
Noga Alon and Yaakov Malinovsky 301

STATISTICAL PRACTICE

- A Comparison of Bayesian Multivariate Versus Univariate Normal Regression Models for Prediction
Xun Li, Joyee Ghosh, and Gabriele Villarini 304
- A Look into the Problem of Preferential Sampling through the Lens of Survey Statistics
Daniel Vedensky, Paul A. Parker, and Scott H. Holan 313

TEACHER'S CORNER

- Integrating Ethics into the Guidelines for Assessment and Instruction in Statistics Education (GAISE)
Rameela Raman, Jessica Utts, Andrew I. Cohen, and Matthew J. Hayat 323
- Consultancy Style Dissertations in Statistics and Data Science: Why and How
Serveh Sharifi Far, Vanda Inácio, Daniel Paulin, Miguel de Carvalho, Nicole H. Augustin, Mike Allerhand, and Gail Robertson 331

REVIEWS OF BOOKS AND TEACHING MATERIALS

LETTERS TO THE EDITOR

- Bartroff, J., Lorden, G. and Wang, L. (2022), "Optimal and Fast Confidence Intervals for Hypergeometric Successes,"
The American Statistician: Comment by Schilling
Mark F. Schilling 342
- Response to Comment by Schilling
Jay Bartroff, Gary Lorden, and Lijia Wang 343
