

CONTENTS

Volume 26 Number 4 2017

Discussion

- 50 Years of Data Science
David Donoho 745
- Comment on "50 Years of Data Science"
Roger D. Peng 767
- Discussion of "50 Years of Data Science"
Susan Holmes and Julie Josse 768
- Greater Data Science Ahead!
Stephanie Hicks 770
- Teaching Data Science in a Statistical Curriculum: Can We Teach More by Teaching Less?
Tian Zheng 772
- All of This Has Happened Before. All of This Will Happen Again: Data Science
Heike Hofmann and Susan VanderPlas 775
- Focusing on the Needs: Experiences of Developing a Data Science Program
Mahbubul Majumder and Xiaoyue Cheng 779
- Greater Data Science at Baccalaureate Institutions
Amelia McNamara, Nicholas J. Horton, and Benjamin S. Baumer 781
- Data Science: A Three Ring Circus or a Big Tent?
Jennifer Bryan and Hadley Wickham 784

High-Dimensional Data

- Fast Embedding for JOFC Using the Raw Stress Criterion
Vince Lyzinski, Youngser Park, Carey E. Priebe, and Michael Trosset 786
- A Robust Model-Free Feature Screening Method for Ultrahigh-Dimensional Data
Jingnan Xue and Faming Liang 803

Dimensional Data

- Sequential Co-Sparse Factor Regression
Aditya Mishra, Dipak K. Dey, and Kun Chen 814
- Bayesian Dimensionality Reduction With PCA Using Penalized Semi-Integrated Likelihood
Piotr Sobczyk, Małgorzata Bogdan, and Julie Josse 826
- Bayesian Fused Lasso Regression for Dynamic Binary Networks
Brenda Betancourt, Abel Rodríguez, and Naomi Boyd 840

Statistical Computing

- Large-Scale Structured Sparsity via Parallel Fused Lasso on Multiple GPUs
Taehoon Lee, Joong-Ho Won, Johan Lim, and Sungroh Yoon 851

(Contents continued on inside back cover)

JCGS is available on JSTOR. JCGS is indexed by Current Index to Statistics, EBSCO Discovery, Google Scholar, SCOPUS, MathSciNet, STMA-Z, and Web of Science.

Cover art adapted from the title of Stephanie Hicks' article "Greater Data Science Ahead!" on p. 770.

Instructions for authors can be found at www.tandfonline.com/r/jcgs.

(Contents continued)

Improving the Graphical Lasso Estimation for the Precision Matrix Through Roots of the Sample Covariance Matrix <i>Vahe Avagyan, Andrés M. Alonso, and Francisco J. Nogales</i>	865
Variational Bayes With Intractable Likelihood <i>Minh-Ngoc Tran, David J. Nott, and Robert Kohn</i>	873
Functional Data	
Depth-Based Recognition of Shape Outlying Functions <i>Stanislav Nagy, Irène Gijbels, and Daniel Hlubinka</i>	883
Bayesian Registration of Functions With a Gaussian Process Prior <i>Yi Lu, Radu Herbei, and Sebastian Kurtek</i>	894
Data Augmentation	
Efficient Bayesian Inference for Multivariate Factor Stochastic Volatility Models <i>Gregor Kastner, Sylvia Frühwirth-Schnatter, and Hedibert Freitas Lopes</i>	905
Efficient Data Augmentation for Fitting Stochastic Epidemic Models to Prevalence Data <i>Jonathan Fintzi, Xiang Cui, Jon Wakefield, and Vladimir N. Minin</i>	918
Short Technical Notes	
On Moments of Folded and Truncated Multivariate Normal Distributions <i>Raymond Kan and Cesare Robotti</i>	930
A Parallel Algorithm for Large-Scale Nonconvex Penalized Quantile Regression <i>Liqun Yu, Nan Lin, and Lan Wang</i>	935
Correction	
Correction to Cook, Gelman, and Rubin (2006) <i>Andrew Gelman</i>	940
Editorial Collaborators	941
