TEST

ORIGINAL PAPERS

- 1 **A goodness-of-fit testing approach for normality based on the posterior predictive distribution**
D. He · X. Xu
- 19 **Recovering the shape of a point cloud in the plane**
B. Pateiro-Lopez · A. Rodriguez-Casal
- 46 **A generalized Pólya urn and limit laws for the number of outputs in a family of random circuits**
J. Moler · E. Plo · H. Urmeneta
- 62 **A note on testing independence by a copula-based order selection approach**
S. Kiwitt · N. Neumeyer
- 83 **A class of rank-based tests for doubly-truncated data**
P.-S. Shen
- 103 **Semiparametric additive models under symmetric distributions**
G. Ibacache-Pulgar · G.A. Paula · F.J.A. Cysneiros
- 122 **Wavelet penalized likelihood estimation in generalized functional models**
I. Gannaz
- 159 **Optimal designs for some stochastic processes whose covariance is a function of the mean**
M. Amor-Salas · J. Lopez-Fidalgo · E. Porcu
