

INVITED PAPER

- 547 F. Ricca • A. Scozzari • P. Serafini • B. Simeone
Error minimization methods in biproportional apportionment

ORIGINAL PAPERS

- 578 T.S.H. Driessen • A.B. Khmelnitskaya • J. Sales
1-concave basis for TU games and the library game
- 592 M. Soleimani-damaneh
Characterizations and applications of generalized invexity and monotonicity in Asplund spaces
- 614 A. Castañer • M.M. Claramunt • M. Mármol
Ruin probability and time of ruin with a proportional reinsurance threshold strategy
- 639 B. Pelegrín • R. Suárez-Vega • S. Cano
Isodistant points in competitive network facility location
- 661 M.A. Hinojosa • A.M. Mármol • F. Sánchez
A consistent talmudic rule for division problems with multiple references
- 679 J.A. Díaz • D. Luna • R. Luna
A GRASP heuristic for the manufacturing cell formation problem
- 707 S. Burer • M. Dror
Newsvendor games: convex optimization of centralized inventory operations
- 729 E. Olivares-Benitez • J.L. González-Velarde • R.Z. Ríos-Mercado
A supply chain design problem with facility location and bi-objective transportation choices
- 754 R. Álvarez-Valdes • E. Crespo • J.M. Tamarit • F. Villa
Minimizing weighted earliness–tardiness on a single machine with a common due date using quadratic models
- 768 K.-I. Chung
The correct proofs for the optimal ordering policy with trade credit under two different payment methods in a supply chain system
- 777 I.M. Ribeiro • M.L. Simoes
Optimal cycle for a signalized intersection using Global Optimization and Complementarity
- 791 C.P. Brás • W.W. Hager • J.J. Júdice
An investigation of feasible descent algorithms for estimating the condition number of a matrix
