

Annals of the Institute of Statistical Mathematics

Vol. 64, No. 5
October 2012

- 881 Naoto Kunitomo
An optimal modification of the LIML estimation for many instruments
and persistent heteroscedasticity
- 911 Ilia Negri and Yoichi Nishiyama
Asymptotically distribution free test for parameter change in a diffusion
process model
- 919 Alexandre Leblanc
On estimating distribution functions using Bernstein polynomials
- 945 Gang Li
Optimal and efficient designs for Gompertz regression models
- 959 Guoqing Diao and Guosheng Yin
A general transformation class of semiparametric cure rate frailty
models
- 991 Takayuki Fujii and Yoichi Nishiyama
Some problems in nonparametric inference for the stress release process
related to the local time
- 1009 Masashi Sugiyama, Taiji Suzuki, and Takafumi Kanamori
Density-ratio matching under the Bregman divergence: a unified
framework of density-ratio estimation
- 1045 Holger Dette, Marcen Marchlewski, and Jens Wagerer
Testing for a constant coefficient of variation in nonparametric
regression by empirical processes
- 1071 Michael Falk and Diana Tichy
Asymptotic conditional distribution of exceedance counts: fragility
index with different margins
- 1087 Solomon W. Harrar and Arne C. Bathke
Erratum to: A modified two-factor multivariate analysis of variance:
asymptotics and small sample approximations
