

**Annals of the Institute of Statistical Mathematics,
ISSN 0020-3157 – volume 62, number 5 (october 2010)**

Nonparametric inference in multiplicative intensity model by discrete time observation

Yoichi Nishiyama

P. 823-833

Nonparametric analysis of doubly truncated data

Pao-sheng Shen

P. 835-853

Decompounding random sums: a nonparametric approach

Martin Bøgsted and Susan M. Pitts

P. 855-872

Dual connections in nonparametric classical information geometry

M. R. Grasselli

P. 873-896

Uniform asymptotics for S- and MM-regression estimators

Marek Omelka and Matías Salibián-Barrera

P. 897-927

Weighted least-squares estimators of parametric functions of the regression coefficients under a general linear model

Yongge Tian

P. 929-941

Wavelet variance analysis for gappy time series

Debashis Mondal and Donald B. Percival

P. 943-966

Statistical inference for functions of the covariance matrix in the stationary Gaussian time-orthogonal principal components model

Ian L. Dryden, Alfred Kume, Huiling Le and Andrew T. A. Wood

P. 967-994
