

Annals of the Institute of Statistical Mathematics

Vol. 63, No. 2
April 2011

- 211 Ilia Negri and Yoichi Nishiyama
Goodness of fit test for small diffusions by discrete time observations
- 227 Yanyuan Ma, Marc G. Genton, and Emanuel Parzen
Asymptotic properties of sample quantiles of discrete distributions
- 245 Holger Dette and Regine Scheder
Estimation of additive quantile regression
- 267 Han-Ying Liang and Jacobo de Uña-Álvarez
Asymptotic properties of conditional quantile estimator for censored dependent observations
- 291 Jordan Stoyanov and Gwo Dong Lin
Mixtures of power series distributions: identifiability via uniqueness in problems of moments
- 305 Angelica Hernandez-Quintero, Jean-François Dupuy, and Gabriel Escarela
Analysis of a semiparametric mixture model for competing risks
- 331 Wen Yu, Yunting Sun, and Ming Zheng
Empirical likelihood method for linear transformation models
- 347 Ivan Kojadinovic and Jun Yan
Tests of serial independence for continuous multivariate time series based on a Möbius decomposition of the independence empirical copula process
- 375 N. Balakrishnan and Po Yang
Forms of four-word indicator functions with implications to two-level factorial designs
- 387 Yasunori Fujikoshi, Tamio Kan, Shin Takahashi, and Tetsuro Sakurai
Prediction error criterion for selecting variables in a linear regression model
- 405 Christophe Chesneau
On adaptive wavelet estimation of a quadratic functional from a deconvolution problem
