

## 100: STATISTICAL PROCESS CONTROL

---

Performance assessment and improvement of control charts for statistical batch process monitoring, *Henk-Jan Ramaker, Eric N.M. van Sprang, Henk-Jan Ramaker, Eric N.M. van Sprang, Johan A. Westerhuis, Stephen P. Gurden, Age K. Smilde, Frank H. van der Meulen* 110:Y 241

Self-adapting control charts, *Willem Albers, Wilbert C.M. Kallenberg* 110:Y 243

Effects of parameter estimation on control chart properties: A literature review, *Willis A. Jensen, L. Allison Jones-Farmer, Charles W. Champ, William H. Woodall* 110:Y 245

Phase I analysis for monitoring nonlinear profiles in manufacturing processes, *Yu Ding, Li Zeng, Shiyu Zhou* 110:Y 249

The use of control charts in health-care and public-health surveillance, *William H. Woodall* 110:Y 253

Statistical process adjustment: A brief retrospective, current status, and some opportunities for further work, *E. del Castillo* 110:Y 257

Using a fractional factorial design to increase direct mail response at *Mother Jones* magazine, *Johannes Ledolter, Arthur J. Swersey* 110:Y 259

Production quality and yield assurance for processes with multiple independent characteristics, *W.L. Pearn, Chien-Wei Wu* 120:Y 261

Permutation methods for comparing process capabilities, *Alan M. Polansky* 120:Y 263

Distorting value added: The use of longitudinal, vertically scaled student achievement data for growth-based, value-added accountability, *Joseph A. Martineau* 190:T 267

## 200: SAMPLING PRINCIPLES AND PLANS

---

Credit to and in acceptance sampling, *David H. Baillie*, 210:Y 269

---

Importance sampling algorithms for Bayesian networks: Principles and performance, <i>Changhe Yuan, Marek J. Druzdzal</i>	210:Y	271
Sequential importance sampling for multiway tables, <i>Yuguo Chen, Ian H. Dinwoodie, Seth Sullivant</i>	210:Y	277
Making simulations more efficient when analyzing Poisson arrival systems and means of monotone functions, <i>Sheldon M. Ross</i>	210:Y	279
Optimal dynamic sample allocation among strata, <i>Joseph B. Kadane</i>	210:Y	281
Likelihood ratio order of $m$ -spacings for two samples, <i>Maochao Xu, Xiaohu Li</i>	210:Y	283
Separating interviewer and sampling-point effects, <i>Rainer Schnell, Frauke Kreuter</i>	230:Y	285
Sample size determination using Bayesian decision criteria under absolute value loss function, <i>T. Pham-Gia, A. Bekker</i>	240:Y	289

### 300: QUALITY MANAGEMENT

---

Comparing quality management practices between the United States and Mexico, <i>Mahour Mellat Parast, Stephanie G. Adams, Erick C. Jones, S. Subba Rao, T.S. Raghu- Nathan</i>	319:Y	293
An exploration of the offset hypothesis using disaggregate data: The case of airbags and antilock brakes, <i>Clifford Winston, Vikram Maheshri, Fred Mannering</i>	339:Y	295
Comparative analysis of Malcolm Baldrige National Quality Award criteria: An empirical study of India, Mexico, and the United States, <i>Marc J. Schniederjans, Mahour Mellat Parast, Majid Nabavi, S. Subba Rao, T.S. Raghu-Nathan</i>	343:Y	297

### 400: CASE STUDIES IN QUALITY

---

The impact of employees' characteristics on total quality service implementation: An empirical study, <i>R. Saravanan, K.S.P. Rao</i>	410:S	299
Beyond PDCA - A new process management model, <i>Praveen Gupta</i>	430:Y	303

Measuring the cost of quality for management, *Gary Cokins* 440:A 305

Managerial accounting and continuous improvement initiatives: A retrospective and framework, *Tom Albright, Marco Lam* 490:Z 307

---

**500: EXPERIMENTATION AND CORRELATION**

---

Performing hypothesis tests on the shape of functional data, *Gareth M. James, Ashish Sood* 511:Y 309

Finding bad values in factorial designs - revisited, *John Lawson, Jonathan Gatlin* 514:Y 311

Combining data in small multiple-method studies, *Charles Hagwood, William Guthrie* 515:Y 313

Evaluation of variance approximations and estimators in maximum entropy sampling with unequal probability and fixed sample size, *Alina Matei, Yves Tille* 515:Y 315

Transforming the exponential by minimizing the sum of the absolute differences, *Shih-Chou Kao, Chuan-Ching Ho, Ying-Chin Ho* 519:Y 317

Design of experiment algorithms for assembled products, *Christine J. Sexton, David K. Anthony, Susan M. Lewis, Colin P. Please, Andy J. Keane* 520:Y 319

Efficient  $2^k$  factorial designs for blocks of size 2 with microarray applications, *Kathleen F. Kerr* 520:Y 325

Fitting logistic regression models with contaminated case-control data, *K.F. Cheng, L.C. Chen* 540:Y 329

Comparison of time series using subsampling, *Andres M. Alonso, Eliazabeth A. Maharaj* 544:Y 331

Cross-validation in nonparametric regression with outliers, *Denis Heng-Yan Leung* 549:Y 333

---

**600: APPLICATIONS**

---

An optimized clustering and selective probing framework to support Internet quality-of-service routing, *Nattaphol Jariyakul, Taieb Znati* 640:S 335

A comparison of bottling alternatives in the pharmaceutical industry, <i>Ruud H. Teunter, Simme Douwe P. Flapper</i>	660:M	339
Refashioning organizational boundaries: Outsourcing customer service work, <i>Janet Walsh, Stephen Deery</i>	670:S	341
Foundations and implications of a proposed unified services theory, <i>Scott E. Sampson</i>	670:S	345
Analysis and improvement of delivery operations at the San Francisco Public Library, <i>Uday M. Apte, Florence M. Mason</i>	670:S	347

---

### 700: ANALYTICAL PROCESS CONTROL

Industrial statistics: A discipline with opportunities and challenges, <i>Jeroen de Mast, Ronald J.M.M. Does</i>	790:Y	349
--	-------	-----

---

### 800: RELIABILITY

Extreme (X-) testing with binary data and applications to reliability demonstration, <i>David Mease, Vijayan N. Nair</i>	820:Y	351
Unreliability evaluation for a limited-flow network with failed nodes subject to the budget constraint, <i>Yi-Kuei Lin</i>	820:Y	353

355
