International Journal
for Theoretical and Applied Statistics

Volume 65 (2)
2007

Eichler M	A frequency-domain based test for non-correlation between stationary time series	133
Kundu D, Gupta RD	Analysis of hybrid life-tests in presence of competing risks	159
Druiilhet P, Markiewicz A	Information matrices for non full rank subsystems	171
Schmelter T	The optimality of single-group designs for certain mixed models	183
Zhang L-X, Yang X-R	The limit distribution of the bootstrap for the unit root test statistic when the residuals are dependent	195
Savani V, Zhigljavsky AA	Efficient parameter estimation for independent and INAR(1) negative binomial samples	207
Chang F-C, Lin H-M	On minimally-supported D -optimal designs for polynomial regression with log-concave weight function	227
Jacroux M	Maximal rank minimum aberration foldover plans for 2^{m-k} fractional factorial designs	235
Fischer M, Klein I	Constructing generalized FGM copulas by means of certain univariate distributions	243
