International Journal
for Theoretical and Applied Statistics

Volume 65 (3)
2007

Krishnamoorthy K, Mukherjee S, Guo H	Inference on reliability in two-parameter exponential stress-strength model	261
Shklyar S, Schneeweiss H, Kukush A	Quasi Score is more efficient than Corrected Score in a polynomial measurement error model	275
Bieniek M	Variation diminishing property of densities of uniform generalized order statistics	297
Tian Y, Herzberg AM	Estimation and optimal designs for linear Haar-wavelet models	311
Hu T, Li Y	Increasing failure rate and decreasing reversed hazard rate properties of the minimum and maximum of multivariate distributions with log-concave densities	325
Štulajter F	Mean squared error of the empirical best linear unbiased predictor in an orthogonal finite discrete spectrum linear regression model	331
Rueda M, Muñoz JF, Berger YG, Arcos A, Martínez S	Pseudo empirical likelihood method in the presence of missing data	349
Filipiak K, Markiewicz A	Optimal designs for a mixed interference model	369
