International Journal
for Theoretical and Applied Statistics

Volume 66 (1)
2007

Wu K, Wu L	Generalized linear mixed models with informative dropouts and missing covariates	1
Domínguez-Mencheró JS, González-Rodríguez G	Analyzing an extension of the isotonic regression problem	19
Evangelaras H, Koukouvinos C, Lappas E	18-run nonisomorphic three level orthogonal arrays	31
Müller UU	Weighted least squares estimators in possibly misspecified nonlinear regression	39
Jokiel-Rokita A, Magiera R	Minimax estimation of a cumulative distribution function by converting to a parametric problem	61
Li Y-X, Wang J-F	Asymptotic distribution for products of sums under dependence	75
Li Y, Shao Q	Slow convergence of the number of near-maxima for Burr XII distributions	89
Li Y, Gao W, Shi N-Z	A note on multinomial maximum likelihood estimation under ordered restrictions and the EM algorithm	105
Sreekumar NV, Thomas PY	Estimation of the parameters of log-gamma distribution using order statistics	115
