International Journal  
for Theoretical and Applied Statistics

Volume 66 (2)  
2007

Danielak K, Dembńska A	On characterizing discrete distributions via conditional expectations of weak record values	129
Angelopoulos P, Evangelaras H, Koukouvinos C, Lappas E	An effective step-down algorithm for the construction and the identification of nonisomorphic orthogonal arrays	139
Jozani MJ, Marchand É	Minimax estimation of constrained parametric functions for discrete families of distributions	151
Rodríguez-Torreblanca C, Rodríguez-Díaz JM	Locally D- and c-optimal designs for Poisson and negative binomial regression models	161
Chen Z	Polar sets of fractional Brownian sheets	173
Belzunce F, Ortega E-M, Pellerey F, Ruiz JM	On rankings and top choices in random utility models with dependent utilities	197
Abdel-Hamid AH, AL-Hussaini EK	Progressive stress accelerated life tests under finite mixture models	213
Bieniek M	On characterizations of distributions by regression of adjacent generalized order statistics	233
Gjestvang CR, Singh S	Forced quantitative randomized response model: a new device	243
