International Journal
for Theoretical and Applied Statistics

Volume 66 (3)
2007

Mostofi AG, Behboodian J	On model selection in Bayesian regression	259
Gottard A	On the inclusion of bivariate marked point processes in graphical models	269
Zhengyan L, Degui L, Jia C	Asymptotic behavior for S-estimators in random design linear model with long-range-dependent errors	289
Campbell PJ	Games of chance with multiple objectives	305
Nguyen TT, Gupta AK, Nguyen DM, Wang Y	Characterizations of negative multinomial distributions based on conditional distributions	315
Schmid F, Schmidt R	Nonparametric inference on multivariate versions of Blomqvist's beta and related measures of tail dependence	323
Rueda M, Martínez-Puertas S, Martínez-Puertas H, Arcos A	Calibration methods for estimating quantiles	355
Niaki STA, Abbasi B	On the monitoring of multi-attributes high-quality production processes	373
