

JOURNAL OF APPLIED STATISTICS

Volume 35 Numbers 5–6 May–June 2008

CONTENTS

X^2 and its components as tests of normality for grouped data <i>D.J. Best, J.C.W. Rayner and O. Thas</i>	481
Forecasting interest rates: a comparative assessment of some second-generation nonlinear models <i>Dilip Nachane and Jose G. Clavel</i>	493
Statistical modeling of enamel rater value data <i>Takafumi Isogai, Hiroaki Uchida, Susumu Miyama and Sadao Nishiyama</i>	515
Screening opportunity bias in case-control studies of cancer screening <i>Stephen W. Duffy, Anne-Helene Olsen, Rhian Gabe, Laszlo Tabar, Jane Warwick, Hilary Fielder, Laufey Tryggvadóttir and Olorunsola F. Agbaje</i>	537
The sensitivity of robust unit root tests <i>Steven Cook</i>	547
On improvement in estimating the population mean in simple random sampling <i>Sat Gupta and Javid Shabbir</i>	559
Bayesian non-parametric models for regional prevalence estimation <i>Adam J. Branscum, Timothy E. Hanson and Ian A. Gardner</i>	567
Sample size selection in clinical trials when population means are subject to a partial order: one-sided ordered alternatives <i>Bahadur Singh, Susan Halabi and Michael J. Schell</i>	583
Optimal lag-length choice in stable and unstable VAR models under situations of homoscedasticity and ARCH <i>R. Scott Hacker and Abdunasser Hatemi-J</i>	601
Marginally restricted D-optimal designs for correlated observations <i>J. López-Fidalgo, R. Martin-Martin and M. Stehlik</i>	617
Fluid flow pattern analysis in a trough region: a nonparametric approach <i>Rahul Mazumder</i>	633
Markov chain Monte Carlo methods for parameter estimation of the modified Weibull distribution <i>H. Jiang, M. Xie and L.C. Tang</i>	647
Monotone fitting for developmental variables <i>Valentin Rousson</i>	659
Reduction of control-chart signal variability for high-quality processes <i>C.D. Lai and K. Govindaraju</i>	671
Analysis of growth curve data by using cubic smoothing splines <i>Tapio Nummi and Laura Koskela</i>	681
A Bayesian analysis of the change-point problem for directional data <i>Ashis SenGupta and Arnab Kumar Laha</i>	693
Comparison of designs for the three-fold nested random model <i>Byoung Cheol Jung, André I. Khuri and Juneyoung Lee</i>	701
