

JOURNAL OF APPLIED STATISTICS

Volume 35 Numbers 9–10 September–October 2008

CONTENTS

Editorial	945
Measures of fit in principal component and canonical variate analyses <i>Sugnet Gardner-Lubbe, Niël J. le Roux and John C. Gower</i>	947
Spatial correlation matrix selection using Bayesian model averaging to characterize inter-tree competition in loblolly pine trees <i>Edward L. Boone and Bronson P. Bullock</i>	967
Results of exploratory data analysis in the broken stick model <i>David Almorza and M. Hortensia Garcia</i>	979
Fitting three-dimensional Laguerre tessellations to foam structures <i>Claudia Lautensack</i>	985
Bayesian assessment of times to diagnosis in breast cancer screening <i>Carmen Armero, Antonio López-Quilez and Rut López-Sánchez</i>	997
Diagnostics of prior-data agreement in applied Bayesian analysis <i>Nicolas Bousquet</i>	1011
Sovereign rescheduling probabilities in emerging markets: a comparison with credit rating agencies' ratings <i>A. Georgievska, L. Georgievska, A. Stojanovic and N. Todorovic</i>	1031
The analysis of age-specific fertility patterns via logistic models <i>Cristina Rueda-Sabater and Pedro C. Alvarez-Esteban</i>	1053
Frailty models and copulas: similarities and differences <i>Klara Goethals, Paul Janssen and Luc Duchateau</i>	1071
Goodness-of-fit measures of R^2 for repeated measures mixed effect models <i>Honghu Liu, Yan Zheng and Jie Shen</i>	1081
Model selection procedures in social research: Monte-Carlo simulation results <i>Lawrence E. Raffalovich, Glenn D. Deane, David Armstrong and Hui-shien Tsao</i>	1093
Two-sided generalized Topp and Leone (TS-GTL) distributions <i>Donatella Vicari, Johan Rene Van Dorp and Samuel Kotz</i>	1115
Predicting body fat using weight–height indices <i>Terence C. Mills</i>	1131
Estimation of the two-parameter bathtub-shaped lifetime distribution with progressive censoring <i>Shuo-fye Wu</i>	1139
A software reliability growth model addressing learning <i>Subburaj Ramasamy and Gopal Govindasamy</i>	1151
ARFIMAX and ARFIMAX-TARCH realized volatility modeling <i>Stavros Degiannakis</i>	1169
Mode type quasi-range and its applications <i>Lin-An Chen, Hsien-Chueh Peter Yang and Chau-Shyun Tang</i>	1181
Multilevel zero-inflated negative binomial regression modeling for over-dispersed count data with extra zeros <i>Abbas Moghimbeigi, Mohammed Reza Eshraghian, Kazem Mohammad and Brian McArdle</i>	1193
