

CONTENTS

N.T. 5907
 Col. 977

Issue 11

| | |
|--|------|
| Modeling longitudinal binomial responses: implications from two dueling paradigms <i>H. Zhang, Y. Xia, R. Chen, D. Gunzler, W. Tang and Xin Tu</i> | 2373 |
| Smooth estimation of mean and dispersion function in extended generalized additive models with application to Italian induced abortion data <i>I. Gijbels and I. Prosdocimi</i> | 2391 |
| Disaggregate-level estimates of indebtedness in the state of Uttar Pradesh in India: an application of small-area estimation technique <i>Hukum Chandra, Nicola Salvati and U.C. Sud</i> | 2413 |
| Comparison of Bayesian models for production efficiency <i>Ricardo S. Ehlers</i> | 2433 |
| Partial logistic relevance vector machines in survival analysis <i>Nicola Lama, Patrizia Boracchi and Elia Biganzoli</i> | 2445 |
| A modified economic-statistical design of the T^2 control chart with variable sample sizes and control limits <i>Asghar Seif, Alireza Faraz, Cédric Heuchenne, Erwin Saniga and M.B. Moghadam</i> | 2459 |
| A new space–time multivariate approach for environmental data analysis <i>Sandra De Iaco</i> | 2471 |
| Sensitivity analysis of linear time-invariant compartmental models with steady-state constraint <i>Suzan Gazioglu and E. Marian Scott</i> | 2485 |
| Mixture models with an improper component <i>N.T. Longford and Pierpaolo D'Urso</i> | 2511 |
| Detecting multiple change points in piecewise constant hazard functions <i>Melody S. Goodman, Yi Li and Ram C. Tiwari</i> | 2523 |
| Statistical learning theory for fitting multimodal distribution to rainfall data: an application <i>Himadri Ghosh and Prajneshu</i> | 2533 |
| A graphical test for local self-similarity in univariate data <i>Rakhee Dinubhai Patel and Frederic Paik Schoenberg</i> | 2547 |
| How are journal impact, prestige and article influence related? An application to neuroscience <i>Chia-Lin Chang, Michael McAleer and Les Oxley</i> | 2563 |
| A single-featured EWMA- X control chart for detecting shifts in process mean and standard deviation <i>Chi-Shuan Liu and Fang-Chih Tien</i> | 2575 |
| Alternative modeling techniques for the quantal response data in mixture experiments <i>Kadri Ulas Akay and Mijgan Tez</i> | 2597 |
| The widespread misinterpretation of p -values as error probabilities <i>Raymond Hubbard</i> | 2617 |

| | |
|---|------|
| Joint analysis of occurrence and time to stability after entrance into the Italian labour market: an approach based on a Bayesian cure model with structured stochastic search variable selection <i>Alessio Farcomeni, Alessandra Nardi and Elena Fabrizi</i> | 2627 |
| Adaptive tangent distance classifier on recognition of handwritten digits <i>Shuen-Lin Jeng and Yu-Te Liu</i> | 2647 |
| Knowledge extraction from a large on-line survey: a case study for a higher education corporate marketing <i>K. Fernández-Aguirre, M.I. Landaluze-Calvo, A. Martín-Arroyuelos and J.I. Modroño-Herrán</i> | 2661 |
| Statement of Retraction | 2681 |

Issue 12

| | |
|--|------|
| Analysis of count data with covariate dependence in both mean and variance <i>M.J. Faddy and D.M. Smith</i> | 2683 |
| Weighted inverse Gaussian – a versatile lifetime model <i>Ramesh C. Gupta and Debasis Kundu</i> | 2695 |
| Comparison between method of moments and entropy regularization algorithm applied to parameter estimation for mixed-Weibull distribution <i>Wen-Liang Hung and Yen-Chang Chang</i> | 2709 |
| Power of the likelihood ratio test for models of DNA base substitution <i>G.B. Cybis, S.R.C. Lopes and H.P. Pinheiro</i> | 2723 |
| Cost-efficient designs based on linearly associated biomarkers <i>Chang-Xing Ma, Albert Vexler, Enrique F. Schisterman and Lili Tian</i> | 2739 |
| Local standardized incidence ratio estimates and comparison with other mapping methods for small geographical areas using Slovenian breast cancer data <i>Tina Žagar, Vesna Zadnik and Maja Primic Žakelj</i> | 2751 |
| Analysis of clustered spatially correlated binary data using autologistic model and Bayesian method with an application to dental caries of 3–5-year-old children <i>Solaiman Afroughi, Soghrat Faghihzadeh, Majid Jafari Khaledi, Mehdi Ghandehari Motlagh and Ebrahim Hajizadeh</i> | 2763 |
| Multilevel IRT models for the university teaching evaluation <i>Silvia Bacci and Valeria Caviezel</i> | 2775 |
| Extreme value and cluster analysis of European daily temperature series <i>Manuel G. Scotto, Susana M. Barbosa and Andrés M. Alonso</i> | 2793 |
| Bayesian confidence interval for the risk ratio in a correlated 2×2 table with structural zero <i>Peng Bai, Wen Gan and Lei Shi</i> | 2805 |
| Modeling wind energy flux by a Birnbaum–Saunders distribution with an unknown shift parameter <i>Victor Leiva, Emilia Athayde, Cecilia Azevedo and Carolina Marchant</i> | 2819 |
| On the improvement of one-sided S control charts <i>Athanasios C. Rakitzis and Demetrios L. Antzoulakos</i> | 2839 |

| | |
|---|------|
| Shared frailty model for recurrent event data with multiple causes <i>P.G. Sankaran and P. Anisha</i> | 2859 |
| Adaptive normal reference bandwidth based on quantile for kernel density estimation <i>Jin Zhang</i> | 2869 |
| Testing for covariate balance using quantile regression and resampling methods <i>Martin Huber</i> | 2881 |
| Robust likelihood inferences for multivariate correlated data <i>Chien-Hung Chen and Tsung-Shan Tsou</i> | 2901 |
| The adaptive accelerated biased coin design for phase I clinical trials <i>Nan Jia and Thomas M. Braun</i> | 2911 |
| Comparison of treatment regimes with adjustment for auxiliary variables <i>Xinyu Tang and Abdus S. Wahed</i> | 2925 |
| Cross-validating fit and predictive accuracy of nonlinear quantile regressions <i>Harry Haupt, Kathrin Kagerer and Joachim Schnurbus</i> | 2939 |
| Some applications of nonlinear and non-Gaussian state-space modelling by means of hidden Markov models <i>Roland Langrock</i> | 2955 |
| Maximum likelihood estimation in Dagum distribution with censored samples <i>Filippo Domma, Sabrina Giordano and Mariangela Zenga</i> | 2971 |
| Book Reviews | 2987 |
