

# JOURNAL OF APPLIED STATISTICS

Volume 38 Numbers 5–6 May–June 2011

## CONTENTS

- Influence diagnostics in Birnbaum–Saunders nonlinear regression models  
*Artur J. Lemonte and Alexandre G. Patriota* 871
- A nonparametric test of symmetry based on the overlapping coefficient  
*Hani M. Samawi, Amal Helu and Robert Vogel* 885
- A step-by-step algorithm for combining diagnostic tests  
*Luis Mariano Esteban, Gerardo Sanz and Angel Borque* 899
- A mixture model for the detection of *Neosporosis* without a gold standard  
*Andrés Farall, Ricardo Maronna and Tomás Tetzlaff* 913
- Testing for variance changes in autoregressive models with unknown order  
*Baisuo Jin, Mong-Na Lo Huang and Baiqi Miao* 927
- Evaluation of Laplace distribution-based ANOVA models applied to microarray data  
*Suzy Van Sanden and Tomasz Burzykowski* 937
- Capturing the re-admission process: focus on time window  
*Eren Demir and Thierry Chausselet* 951
- A variable selection approach to monotonic regression with Bernstein polynomials  
*S. McKay Curtis and Sujit K. Ghosh* 961
- Analysis of rounded exponential data  
*Gunnar Taraldsen* 977
- Bayesian–frequentist hybrid model with application to the analysis of gene copy number changes  
*Ao Yuan, Guanjie Chen, Juan Xiong, Wenqing He, Wen Jin and Charles Rotimi* 987
- Modified minimum covariance determinant estimator and its application to outlier detection of chemical process data  
*Guoqing Wu, Chao Chen and Xuefeng Yan* 1007
- Classification with discrete and continuous variables via general mixed-data models  
*A.R. de Leon, A. Soo and T. Williamson* 1021

(Contents continued on inside back cover)

The difference-sign runs length distribution in testing for serial independence <i>Camillo Cammarota</i>	1033
On Bayesian sample size determination <i>M.M. Nassar, S.M. Khamis and S.S. Radwan</i>	1045
Identifying predictors of violent behaviour among students using the conventional logistic and multilevel logistic models <i>Bidemi Yusuf, Olayinka Omigbodun, Babatunde Adedokun and Odunayo Akinyemi</i>	1055
Leverage analysis for linear mixed models <i>Juvêncio S. Nobre and Julio M. Singer</i>	1063
On an extension of the von Mises distribution due to Batschelet <i>Arthur Pewsey, Kunio Shimizu and Rolando de la Cruz</i>	1073
$D_r$ -optimal designs for Kozak's tree taper model <i>Leakemariam Berhe and Göran Arnoldsson</i>	1087
Bayesian latent variable model for mixed continuous and ordinal responses with possibility of missing responses <i>E. Bahrami Samani and M. Ganjali</i>	1103
Testing the equality among distribution functions from independent and right censored samples via Cramér-von Mises criterion <i>Pablo Martínez-Cambor</i>	1117
Testing stochastic orders in tails of contingency tables <i>Chi Tim Ng, Johan Lim and Kyu S. Hahn</i>	1133
Spatial-temporal model for wind speed in Lithuania <i>Jūratė Šaltytė Benth and Laura Šaltytė</i>	1151
Elliptical safety region plots for $C_{pk}$ <i>Malin Albing and Kerstin Vännman</i>	1169
Modeling attendance at Spanish professional football league <i>Guillermo Villa, Isabel Molina and Roland Fried</i>	1189
Comparing diagnostic tests with missing data <i>Frederico Z. Poletto, Julio M. Singer and Carlos Daniel Paulino</i>	1207
A modified bootstrap procedure for cluster sampling variance estimation of species richness <i>Steen Magnussen and Ron McRoberts</i>	1223
The Poisson-exponential distribution: a Bayesian approach <i>Francisco Louzada-Neto, Vicente G. Cancho and Gladys D.C. Barriga</i>	1239
Testing for qualitative interaction of multiple sources of informative dropout in longitudinal data <i>Sara B. Crawford and John J. Hanfelt</i>	1249
Empirical likelihood for generalized partially linear varying-coefficient models <i>Zhensheng Huang</i>	1265
Comparison of estimation methods for the finite population mean in simple random sampling: symmetric super-populations <i>Arzu Altin Yavuz and Birdal Senoglu</i>	1277
A two-step robust estimation of the process mean using M-estimator <i>Hamid Shahriari, Orod Ahmadi and Amir H. Shokouhi</i>	1289
A Bayesian model for estimating the malaria transition probabilities considering individuals lost to follow-up <i>Edson Zangiacomi Martinez, Davi Casale Aragon and Jorge Alberto Achar</i>	1303
Book Reviews	1311
