

CONTENTS

Issue 7

Powerful nonparametric statistics to compare $k$ independent ROC curves <i>Pablo Martínez-Cambor, Carlos Carleos and Norberto Corral</i>	1317
Likelihood testing populations modeled by autoregressive process subject to the limit of detection in applications to longitudinal biomedical data <i>Albert Vexler, Jihnhhee Yu and Alan D. Hutson</i>	1333
Testing for co-directional interactions using union–intersection and intersection–union methods <i>Patrick D. Gerard and Julia L. Sharp</i>	1347
Measuring effect size: a robust heteroscedastic approach for two or more groups <i>Rand R. Wilcox and Tian S. Tian</i>	1359
Normality testing: two new tests using L-moments <i>Ardian Harri and Keith H. Coble</i>	1369
An empirical analysis of the volatility of the Japanese stock price index: a non-parametric approach <i>Katsuyuki Takahashi and Isao Shoji</i>	1381
A general hazard model for lifetime data in the presence of cure rate <i>Gleici Castro Perdoná and Francisco Louzada-Neto</i>	1395
Long-range dependence analysis of Internet traffic <i>Cheolwoo Park, Félix Hernández-Campos, Long Le, J. S. Marron, Juhyun Park, Vladas Pipiras, F. D. Smith, Richard L. Smith, Michele Trovero and Zhengyuan Zhu</i>	1407
Residuals for log-Burr XII regression models in survival analysis <i>Giovana O. Silva, Edwin M.M. Ortega and Gilberto A. Paula</i>	1435
Two kinds of restricted modified estimators in linear regression model <i>Yalian Li and Hu Yang</i>	1447
Multivariate temporal disaggregation with cross-sectional constraints <i>Tommaso Proietti</i>	1455
Confidence interval procedures for proportions estimated by group testing with groups of unequal size adjusted for overdispersion <i>Shih-Chia Liu, Kuo-Szu Chiang, Cheng-Hsiang Lin and Ting-Chin Deng</i>	1467
Comparing first hitting time and proportional hazards regression models <i>D. Stogiannis, C. Caroni, C.E. Anagnostopoulos and I.K. Toumpoulis</i>	1483
A class of designs for Phase I cancer clinical trials combining Bayesian and likelihood approaches <i>Zheng Su</i>	1493
The corrected VIF (CVIF) <i>José Dias Curto and José Castro Pinto</i>	1499
Tests of heteroscedasticity and correlation in multivariate $t$ regression models with AR and ARMA errors <i>Jin-Guan Lin, Li-Xing Zhu, Chun-Zheng Cao and Yong Li</i>	1509

 col. 9 77

## Issue 8

Revealing age-specific past and future unrelated costs of pneumococcal infections by flexible generalized estimating equations <i>An Creemers, Marc Aerts, Niel Hens, Ziv Shkedy, Frank De Smet and Philippe Beutels</i>	1533
Taylor linearization sampling errors and design effects for poverty measures and other complex statistics <i>Vijay Verma and Gianni Betti</i>	1549
Likelihood-based approach for analysis of longitudinal nominal data using marginalized random effects models <i>Keunbaik Lee, Sanggil Kang, Xuefeng Liu and Daekwan Seo</i>	1577
Do large firms overly use stock-based incentive compensation? <i>Ming-Yuan Leon Li and Shang-En Shine Yu</i>	1591
Diagnostic plots in beta-regression models <i>Li-Chu Chien</i>	1607
A sequential conditional probability ratio test procedure for comparing diagnostic tests <i>Liansheng Tang, Ming Tan and Xiao-Hua Zhou</i>	1623
Influence analysis in skew-Birnbaum–Saunders regression models and applications <i>Lucia Santana, Filidor Vilca and Victor Leiva</i>	1633
Non-mixture cure correlated frailty models in Bayesian approach <i>Mitra Rahimzadeh, Ebrahim Hajizadeh and Farzad Eskandari</i>	1651
A flexible parametric survival model which allows a bathtub-shaped hazard rate function <i>William J. Reed</i>	1665
A Monte Carlo simulation study on partially adaptive estimators of linear regression models <i>Yeliz Mert Kantar, Ilhan Usta and Şükriü Acıtaş</i>	1681
Optimization of a product performance using mixture experiments including process variables <i>L.H.A. Dal Bello and A.F.C. Vieira</i>	1701
Double generalized linear model for tissue culture proportion data: a Bayesian perspective <i>Afrânio M.C. Vieira, Roseli A. Leandro, Clarice G.B. Demétrio and Geert Molenberghs</i>	1717
A joint modeling approach for spatial earthquake risk variations <i>Chun-Shu Chen and Hong-Ding Yang</i>	1733
Book Reviews	1743
Statement of Withdrawal	1747
