Special issue: Dedicated to Antoon Kolen

- | | | |
|-----|--|--|
| 1 | Editorial introduction | C. P. M. van Hoesel
A. P. M. Wagelmans |
| 4 | A genetic algorithm for the partial binary constraint satisfaction problem: an application to a frequency assignment problem | A. W. J. Kolen |
| 16 | On the p -coverage problem on the real line | C. P. M. van Hoesel
A. P. M. Wagelmans |
| 35 | Disconnecting graphs by removing vertices: a polyhedral approach | M. Oosten
J. H. G. C. Rutten
F. C. R. Spieksma |
| 61 | Heuristic estimates in shortest path algorithms | W. Pijls |
| 75 | Multiplicity and complexity issues in contemporary production scheduling | N. Brauner
Y. Crama
A. Grigoriev
J. van de Klundert |
| 92 | Disruption management in flight gate scheduling | U. Dorndorf
F. Jaehn
C. Lin
H. Ma
E. Pesch |
| 115 | Tight LP-based lower bounds for wavelength conversion in optical networks | A. M. C. A. Koster
A. Zymolka |
| 137 | Optimal prepayment of Dutch mortgages | B. H. M. Kuijpers
P. C. Schotman |
| 156 | Note on the applicability of the VCG mechanism to capacitated assignment problems and extensions | R. B. Lok
D. Romero Morales
D. Vermeulen |

0039-0402 (200702) 61:01;1-Q
