

Contents

- 273 Extensions of linear diagonal-parameter symmetry and quasi-symmetry models for cumulative probabilities in square contingency models
S. Tomizawa
N. Miyamoto
K. Yamamoto
A. Sugiyama
- 284 Constructing optimal randomized response designs with consideration for the level of privacy protection
K.-C. Huang
- 292 Analysis of marginally specified semi-nonparametric models for clustered binary data
S. Ghosh
K. Das
P. Congdon
- 305 A new continuous distribution and two new families of distributions based on the exponential
G. Jasso
S. Kotz
- 329 Adaptive two-treatment two-period crossover design for binary treatment responses
U. Bandyopadhyay
A. Biswas
S. Mukherjee
- 345 A Bayesian approach for exact optimal measurement and cutting times for a Eucalyptus production forest
M. J. Paulo
A. Otten
- 358 Covariance functions which are stationary or nonstationary in space and stationary in time
E. Porcu
J. Mateu
M. Bevilacqua
