

TECHNOMETRICS

Volume 49, Number 1, February 2007

Functionally Induced Priors for the Analysis of Experiments

V. Roshan Joseph and
James Dillon Delaney 1

Smoothing Balanced Single-Error-Term Analysis of Variance

James S. Hodges, Yue Cui,
Daniel J. Sargent, and Bradley P. Carlin 12

Diagnostics for Linear Models With Functional Responses

Qing Shen and Hongquan Xu 26

Nonlinear Regression With Censored Data

Cédric Heuchenne and
Ingrid Van Keilegom 34

Efficient Nearly Orthogonal and Space-Filling Latin Hypercubes

Thomas M. Cioppa and
Thomas W. Lucas 45

Construction of Balanced Equivalent Estimation Second-Order Split-Plot Designs

Peter A. Parker, Scott M. Kowalski,
and G. Geoffrey Vining 56

Finite-Horizon Prediction of Recurrent Events, With Application to Forecasts of Warranty Claims

Marc Fredette and J. F. Lawless 66

Bayesian Approaches to Calculating a Reference Value in Key Comparison Experiments

Blaza Toman 81

A Kolmogorov–Smirnov-Type Test for Shortfall Dominance Against Parametric Alternatives

Michel Denuit, Anne-Cécile Goderniaux,
and Olivier Scaillet 88

Book Reviews 99

The 2005 Technometrics Prizes 112
