ORIGINAL PAPERS

Supervised learning of multivariate skew normal mixture models with missing information
T.-C. Lin · T.-I. Lin 183

Nonparametric estimation of the bivariate survival function for one modified form of doubly censored data
P. Shen 203

Bayesian multiple change-point estimation with annealing stochastic approximation Monte Carlo
J. Kim · S. Cheon 215

GEVA: geometric variability-based approaches for identifying patterns in data
I. Irigoien · C. Arenas · E. Fernández · F. Mestres 241

Probability plots and order statistics of the standard extreme value distribution
M.N. Pirouzi Fard 257

A note on studentized confidence intervals for the change-point
M. Hušková · C. Kirch 269

Parallel computing in the statistical system Jasp
Y. Yamamoto · J. Nakano · T. Fujiwara 291

Using one EWMA chart to jointly monitor the process mean and variance
M.B.C. Khoo · Z. Wu · C.-H. Chen · K.W. Yeong 299

KmL: k-means for longitudinal data
C. Genolini · B. Falissard 317

On inference based on the one-sample sign statistic for long-range dependent data
Z. Psaradakis 329

Penalized regression with individual deviance effects
A. Perperoglou · P.H.C. Eilers 341
