## ORIGINAL PAPERS

**Comparing  $k$ -independent and right censored samples based on the likelihood ratio**  
P. Martínez-Cambor 363

**On Bayesian estimation of a survival curve: comparative study and examples**  
V.H. Salinas · J.S. Romeo · A. Peña 375

**Mode testing via higher-order density estimation**  
M.C. Minnotte 391

**An acceleration method for Ten Berge et al.'s algorithm for orthogonal INDSCAL**  
Y. Takane · K. Jung · H. Hwang 409

**Confidence intervals for the regression parameter based on weighted log-rank estimating functions**  
S.-H. Lee 429

**Model selection via adaptive shrinkage with  $t$  priors**  
A. Armagan · R.L. Zaretzki 441

**A computationally efficient model selection in the generalized linear mixed model**  
T. Yoshida · M. Kanba · K. Naito 463

**On the favorable estimation for fitting heavy tailed data**  
M. Stehlík · R. Potocký · H. Waldl · Z. Fabián 485

**Binary geometric process model for the modeling of longitudinal binary data with trend**  
J.S.K. Chan · D.Y.P. Leung 505

## SHORT NOTE

**A note on the prior parameter choice in finite mixture models of distributions from exponential families**  
M.J. Rufo · J. Martín · C.J. Pérez 537
