

Computational Statistics

25 · 4

2010

Special Issue on the 2006 Data Exposition Competition of the American Statistical Association

The 2006 Data Expo of the American Statistical Association
P. Murrell 551

Visualizing abnormal climate changes in Central America from 1995 to 2000
S.-H. Cho · H. Chun 555

Glaciers melt as mountains warm: a graphical case study
J. Hobbs · H. Wickham · H. Hofmann · D. Cook 569

A two-step process for graphically summarizing spatial temporal multivariate data in two dimensions
S.K. Eden · A.Q. An · J. Horner · C.A. Jenkins · T.A. Scott 587

ORIGINAL PAPERS

Comparison of various statistical methods for detecting disease outbreaks
B.Y. Choi · H. Kim · U.Y. Go · J.-H. Jeong · J.W. Lee 603

On principal Hessian directions for multivariate response regressions
H.-H. Lue 619

**A numerical comparison of the normal and some saddlepoint approximations
to a distribution-free test for stochastic ordering in the competing risks model**
H. Murakami 633

Normal correlation coefficient of non-normal variables using piece-wise linear approximation
D. Kugiumtzis · E. Bora-Senta 645

A fast algorithm for robust regression with penalised trimmed squares
L. Pitsoulis · G. Zioutas 663

Genetic algorithms with shrinking population size
J.W. Hallam · O. Akman · F. Akman 691

A robust test of specification based on order statistics
M. Furno 707

SHORT NOTE

A comparison of bootstrap and Monte-Carlo testing approaches to value-at-risk diagnosis
H. Herwartz · I. Waichman 725
