ORIGINAL PAPERS

Bayesian subset selection for threshold autoregressive moving-average models
C.W.S. Chen · F.C. Liu · R. Gerlach 1

Copula parameter estimation by maximum-likelihood and minimum-distance estimators: a simulation study
G. Weiß 31

Testing the equality of several gamma means: a parametric bootstrap method with applications
C.-H. Chang · J.-J. Lin · N. Pal 55

Detecting and modeling nonlinearity in the gas furnace data
H.H. Stokes · M. Hinich 77

A multinomial tree model for pricing credit default swap options
Y.-P. Chang · M.-C. Hung · Y.-C. Ko 95

Bayesian approach to analysing longitudinal bivariate binary data with informative dropout
J.S.K. Chan · W.Y. Wan 121

Nonparametric estimation with doubly censored and truncated data
P. Shen 145

Prediction interval for disease mapping using hierarchical likelihood
Y. Lee · M. Jang · W. Lee 159
