<b>Part I: Executive summary</b> .....	5
1. Introduction .....	7
2. Main policy developments .....	8
3. Market performance .....	11
3.1. Market structure and competition .....	11
3.2. Prices, output, employment and productivity .....	11
4. Market integration .....	13
5. Distributive effects of market opening .....	15
6. Fulfilment of public service obligations .....	17
7. Consumers' views .....	19
8. Conclusions .....	21
<b>Part II: Main report</b> .....	23
1. Introduction .....	25
2. The evolution of the competitive and legislative framework .....	26
2.1. Telecommunications .....	26
2.2. Electricity and gas .....	27
2.3. Transport .....	28
2.4. Postal services .....	29
3. Market performance .....	31
3.1. The rationale for market opening and its macroeconomic implications .....	31
3.2. Market structure and competition .....	32
3.3. Prices .....	36
3.4. Output .....	40
3.5. Employment .....	40
3.6. Labour productivity .....	41
4. Market integration in network industries .....	45
4.1. Barriers to integration .....	45
4.1.1. Technical barriers to integration .....	45
4.1.2. Legal barriers .....	47
4.1.3. Inherited advantages of incumbents that hinder integration .....	48
4.1.4. Customer behaviour .....	48
4.1.5. Protectionism and government intervention .....	48

4.2.	Indicators of market integration . . . . .	49
4.2.1.	Price dispersion in network industries . . . . .	49
4.2.2.	Cross-border mergers and acquisitions activity in network industries. . . . .	51
5.	Distributive effects of market opening . . . . .	55
5.1.	Distributive effects on consumers . . . . .	55
5.1.1.	Electricity . . . . .	55
5.1.2.	Telecommunication services . . . . .	58
5.1.3.	Synthesis across Member States. . . . .	59
5.2.	Territorial cohesion . . . . .	61
5.2.1.	Electricity sector. . . . .	61
5.2.2.	Rail transport . . . . .	65
5.2.3.	Air transport . . . . .	69
6.	Evolution of public service obligation . . . . .	71
6.1.	Accessibility of services . . . . .	71
6.1.1.	Postal services . . . . .	71
6.1.2.	Telecommunications. . . . .	73
6.1.3.	Rail transport . . . . .	76
6.1.4.	Energy. . . . .	79
6.2.	Affordability . . . . .	79
6.2.1.	Electricity . . . . .	80
6.2.2.	Gas . . . . .	80
6.3.	Quality . . . . .	83
6.3.1.	Postal services . . . . .	83
6.3.2.	Air transport . . . . .	84
6.3.3.	Energy. . . . .	85
7.	Consumers' views . . . . .	90
8.	Statistical annex . . . . .	95

## Figures

1:	Evolution of network industry price indices relative to the all-items HICP since 1996, EU-25 . . . . .	38
2:	Evolution of prices in electricity and gas, 2000–06 . . . . .	39
3:	Average annual change of USP tariffs for 20 g letters and 5 kg domestic parcels, 2000–05 . . . . .	40
4:	Evolution of employment in electricity, gas and water, 1996–2003. . . . .	42
5:	Evolution of employment in communication services, 1996–2003 . . . . .	42
6:	Evolution of employment in transport industries . . . . .	43
7:	Hourly labour productivity in the EU-15, 1993–2003 . . . . .	44
8:	Hourly labour productivity in the NMS, 1993–2003 . . . . .	44
9:	Evolution of M&A activity in network industries . . . . .	52
10:	Evolution of the share of cross-border deals in network industries . . . . .	53
11:	Electricity prices 2004 by consumption level and Member State. . . . .	56
12:	Direct effect of price changes in network industries for income quintiles, in % (1) — 1994–2004 . . .	59
13:	Direct effect of price changes in network industries for income quintiles, in % (2) — 1994–2004 . . .	60
14:	Direct price effect 1994–2004 on expenditure, across Member States, by service sector and income quintile. . . . .	60

15: Overall change in expenditure share for services of network industries, low and high income households — 1994–2004, in %	62
16: Overall change in expenditure share 1994–2004 across Member States, by services sector and income quintile	62
17: Electricity prices by household categories — Germany	63
18: Electricity prices by household categories — United Kingdom	66
19: Development of rail fares — United Kingdom	67
20: Railway usage — United Kingdom	68
21: Number of non-stop city pairs by destination, July 1992–2003	69
22: Growth of major EU airports and passenger growth, 2000–03	70
23: Number of postal outlets per 10 000 inhabitants	73
24: Number of main telephone lines per 100 inhabitants	75
25: Subscriptions to mobile phones per 100 inhabitants	76
26: Mobile penetration and growth, 2004–05	77
27: Railway lines density, 2000–04	77
28: Stock of rail vehicles — EU total	78
29: Average spending on electricity by low-income consumers	81
30: Percentage of income spent on electricity by low-income consumers	81
31: Average spending on gas by low-income consumers	82
32: Percentage of income spent on gas services by low-income consumers	82
33: D+1 transit time targets, 2003, 2004 and 2005	83
34: Transit time performance D+1, 2003–05	84
35: Overall satisfaction and dissatisfaction with services of general interest	92
36: Protection of consumers' interests	94
37: Evolution of telecommunication tariffs for a 10-minute call, 2000–05	98
38: Price of fixed calls charged by incumbents and competitors, September 2005	99

## Tables

1: Market structure in the telecommunications market	35
2: Inflation in EU-25 network industries	37
3: Member States with low levels of electricity interconnection capacity	46
4: Price dispersion in different network industries	50
5: Final decisions under the merger regulation involving firms of network industries, 1995–2006	54
6: Electricity prices 1994–2004 by consumption level — EU-15	56
7: Effect of changes in electricity markets 1994–2004 on total household spending, in %	57
8: Effect of telecommunications price changes 1994–2004 on total household spending, in %	58
9: Electricity prices by industry categories — Germany	65
10: Specific additional requirements on access to postal outlets	72
11: Development of the postal network in the EU-25, 2002–04	72
12: Delivery requirements for delivery of postal items, 2006	74

13: Penetration rates for key electronic communication services (survey results) . . . . .	75
14: Rail: stock of passenger transport vehicles (coaches, railcars, trailers) . . . . .	78
15: Definition of vulnerable consumers . . . . .	79
16: Mail delivery: international mail within Europe . . . . .	84
17: Arrival punctuality <15 minutes by AEA airline . . . . .	85
18: Departure punctuality <15 minutes by AEA airline . . . . .	85
19: Unplanned interruptions: minutes lost and number of interruptions per customer per year, 1999–2004 . . . . .	86
20: Reported energy-specific rules for compensation of damage due to service interruption . . . . .	87
21: Reported energy-specific rules for refunds in case of service interruption. . . . .	88
22: Conditions for supply interruption in energy sector . . . . .	88
23: Share of renewable energy in total electricity consumption: actual and 2010 target, in % . . . . .	89
24: Drivers of consumer satisfaction. . . . .	92
25: Consumer satisfaction levels in the EU-25 . . . . .	93
26: Comparison of consumer satisfaction between the EU-15 and the NMS . . . . .	93
27: Market opening in electricity and gas, 2005 . . . . .	95
28: Market structure in electricity and gas markets, 2004 . . . . .	96
29: Perceived degree of competition in domestic letter post, 2005. . . . .	97
30: Employment in telecommunications. . . . .	100
31: Universal service provider employment (thousands, headcount), postal services, EU-25 . . . . .	100
32: Congestion in electricity interconnections: hours with congestion as a percentage of all hours (selection of borders). . . . .	101
33: Congestion on gas transit pipelines in the EU . . . . .	102
34: Final decisions under the merger regulation involving firms of network industries (detail), 1995–2006. . . . .	103

**Boxes**

1: OECD indicators of regulatory conditions in network industries . . . . .	33
2: Calculation of affordability indices. . . . .	80
3: Studies on consumers' views on services of general economic interest. . . . .	91
