<b>Summary and main findings</b> .....	5
<b>Part I — Employment and wage developments</b> .....	13
Summary .....	15
1. General developments in 2006 .....	17
1.1. Employment and unemployment performance .....	17
1.2. Monitoring the gap with the Lisbon employment targets .....	26
2. Employment developments and economic growth .....	34
2.1. The responsiveness of employment to economic growth .....	34
2.2. The contribution of employment and labour productivity to GDP growth .....	36
2.3. Employment prospects in the coming years .....	41
3. Wage and labour cost developments .....	45
3.1. Introduction .....	45
3.2. Labour cost developments and macroeconomic stability in the euro area .....	46
3.2.1. Labour cost developments and internal macroeconomic balance in the euro area .....	46
Box 1 — The evolution of tax wedges on labour .....	50
3.2.2. Labour cost developments and external macroeconomic conditions in the euro area ...	64
3.2.3. Labour cost developments in Denmark, Sweden and the UK .....	68
3.3. Real consumption wages, real production wages and the domestic terms of trade revisited ...	70
3.4. Wage developments and income distribution: an analysis of trends in the labour share using sectoral data .....	75
3.5. Labour cost developments and macroeconomic stability in the new Member States .....	82
<b>Part II — Special focus</b> .....	101
Summary .....	103
1. Relative unit labour costs in the euro area: a disaggregated industry-level analysis .....	105
1.1. Introduction .....	105
Box 2 — Does inflation reduce the volatility of employment over the cycle? Indirect evidence of downward nominal wage rigidity .....	106
1.2. The data .....	108
1.3. Preliminary data analysis .....	111
1.4. Exploring the presence of downward rigidity in relative wages .....	116
1.4.1. Relative wage cuts .....	119
1.4.2. How do relative wage changes relate to relative productivity changes? .....	123
1.5. Are relative unit labour costs more volatile and persistent at the industry level? .....	126

1.6.	The cyclical response of relative unit labour costs: do disaggregate industry data make a difference? . . . . .	129
1.6.1.	Main results of the empirical analysis . . . . .	134
1.7.	Conclusions . . . . .	140
<b>References</b>	. . . . .	141
<b>Statistical annex</b>	. . . . .	143
<b>List of tables</b>		
Table 1	— Labour market indicators . . . . .	18
Table 2	— Employment growth — Contribution by gender and age groups (in %). . . . .	20
Table 3	— Employment rate and participation rate contribution to changes by gender and age groups . . . . .	23
Table 4	— Decomposing changes in the EU unemployment rate in 2006 . . . . .	27
Table 5	— Lisbon employment targets: required job performance. . . . .	28
Table 6	— Employment growth rate used in the simulation (%) . . . . .	31
Table 7	— Employment rates in 2010, alternative simulation (%) . . . . .	31
Table 8	— Job-intensity of growth (elasticity of employment to growth) . . . . .	39
Table 9	— GDP growth and its sources in 2006 . . . . .	40
Table 10	— GDP growth and its sources, 1997–2006 . . . . .	42
Table 11	— Commission’s forecasts (autumn 2006 and spring 2007) . . . . .	44
Table 12	— Recent labour cost indicators in the euro area. . . . .	49
Table 13	— Total tax wedge on labour (including employers’ social security contributions) . . . . .	49
Table 14	— Tax wedge on labour and its components for the average-wage worker . . . . .	52
Table 15	— Tax wedge on labour and its components for the low-wage worker. . . . .	52
Table 16	— Labour cost indicators across EU-15 countries. . . . .	56
Table 17	— Adjusted labour share at sectoral level — EU-15 Member States . . . . .	87
Table 18	— Breakdown of real unit labour costs, NMS compared to several EU aggregates . . . . .	94
Table 19	— Industry breakdown considered in this study . . . . .	110
Table 20	— Sectors with declining and/or increasing value added and unit labour costs, 1992–98 . . . . .	111
Table 21	— Sectors with declining and/or increasing value added and unit labour costs, 1999–2004 . . . . .	112
Table 22	— Annual average growth rate of unit labour costs, 1992–98 and 1999–2004 . . . . .	113
Table 23	— Distribution of relative wage changes as a proportion of all changes in each period . . . . .	122
Table 24	— Main characteristics of the distribution by industries of the relative wage cuts . . . . .	123
Table 25	— Relative wage cuts over time. . . . .	123
Table 26	— Average number of wage cuts (or wage increases) as percentage of all wage cuts (or increases) . . . . .	125
Table 27	— Fraction of relative wage cuts prevented (FRWP) at 0 and proportion of industries with the relative wage differential lower than the relative productivity differential. . . . .	126
Table 28	— Volatility and persistence of changes in relative unit labour costs: aggregate data . . . . .	128
Table 29	— Volatility and persistence of changes in relative unit labour costs: disaggregate data . . . . .	130
Table 30	— Industries with the highest and lowest volatility and persistence of the changes in the relative unit labour cost . . . . .	131
Table 31	— The cyclical sensitivity of the relative unit labour costs: all sectors . . . . .	135
Table 32	— The cyclical sensitivity of the relative unit labour costs: manufacturing . . . . .	136
Table 33	— The cyclical sensitivity of the relative unit labour costs: country-specific estimates . . . . .	136

## List of graphs

Graph 1 — Employment growth, 2000–06 . . . . .	18
Graph 2 — Contribution of full-time and permanent employment to total employment growth, EU-25 (in %) . . . . .	19
Graph 3 — Changes in the employment rate over 2005–06 relative to the average changes over 2000–05 (in percentage points) . . . . .	21
Graph 4 — Changes in the participation rate of older female workers (in percentage points) . . . . .	21
Graph 5 — Dispersion of unemployment rates in the EU . . . . .	24
Graph 6 — Beveridge curve and aggregate demand constraints in the euro area . . . . .	25
Graph 7 — Estimates of structural and cyclical unemployment rates in 2006 (in %) . . . . .	26
Graph 8 — Employed and unemployed persons (age 15–64), euro area . . . . .	28
Graph 9 — Progress towards the Lisbon targets: total and female employment rates, 2006 . . . . .	30
Graph 10 — Progress towards the Lisbon targets: total and older worker employment rates, 2006 . . . . .	30
Graph 11 — Aggregate and sectoral employment and economic activity in the euro area . . . . .	35
Graph 12 — Sectoral employment in the euro area (1995=100) . . . . .	36
Graph 13 — Job-intensity of growth . . . . .	37
Graph 14 — Total apparent elasticity of employment to growth and sectoral contributions . . . . .	38
Graph 15 — Employment and unemployment expectations: business and consumer survey . . . . .	43
Graph 16 — Quarterly nominal wage growth, euro area . . . . .	48
Graph 17 — Contribution of wage and non-wage costs to total LCI growth, euro area . . . . .	48
Graph 18 — Income decomposition of GDP deflator, euro area . . . . .	49
Graph 19 — Sectoral labour cost developments, euro area . . . . .	53
Graph 20 — Industry (excluding construction) . . . . .	53
Graph 21 — Construction . . . . .	54
Graph 22 — Trade, repairs, hotels, restaurants, transport and communication services . . . . .	54
Graph 23 — Financial intermediation, real estate, renting and business activities . . . . .	55
Graph 24 — Sectoral unit labour cost developments . . . . .	55
Graph 25 — Compensation per employee and nominal unit labour costs, euro area with and without Germany . . . . .	57
Graph 26 — Sectoral decomposition of VA deflator, selected EU-15 Member States . . . . .	57
Graph 27 — Employment and real compensation per employee, euro area, 1995–2006 . . . . .	59
Graph 28 — Real wages across cycles, euro area . . . . .	60
Graph 29 — Employment across cycles, euro area . . . . .	60
Graph 30 — Contribution of employment and real wages to the real wage bill, euro area . . . . .	61
Graph 31 — Contribution of employment and real wages to consumption, EU-15 Member States . . . . .	61
Graph 32 — HP-filtered labour productivity growth, euro area . . . . .	63
Graph 33 — Potential labour productivity growth, euro area (Production function methodology) . . . . .	63
Graph 34 — ULC-based REER movements and current account developments in former euro-area-12 members . . . . .	65
Graph 35 — Real effective exchange rates based on ULC, euro-area-12 members . . . . .	65
Graph 36 — Relative unit labour costs, compensation per employee and productivity . . . . .	66
Graph 37 — 2004–06 average ULC-based REER change versus average output gap differential against euro-area partners . . . . .	68
Graph 38 — Compensation per employee and trend labour productivity developments, EU-15 . . . . .	69

Graph 39 — Compensation per employee in Denmark, Sweden and the UK compared with the euro area	70
Graph 40 — Real unit labour costs in Denmark, Sweden and the UK compared with the euro area . . . .	71
Graph 41 — Real consumption wages, real production wages and the domestic terms of trade, EU-15 .	73
Graph 42 — Non-adjusted versus adjusted labour share, EU-15 Member States . . . . .	78
Graph 43 — Adjusted labour share on the basis of both aggregate and sectoral data, EU-15 Member States . . . . .	80
Graph 44 — Sources of changes (%) in the labour share in selected sub-periods, 1970–85, 1986–95, 1996–04 . . . . .	83
Graph 45 — Adjusted labour share versus adjusted labour share for given sectoral and employment composition at 1970 levels, EU-15 Member States. . . . .	85
Graph 46 — Convergence of NMS with the EU-15: real GDP growth. . . . .	88
Graph 47 — Convergence of NMS with the EU-15: per capita GDP relative to EU-15. . . . .	89
Graph 48 — $\sigma$ -convergence across NMS. . . . .	89
Graph 49 — Convergence of NMS with the EU-15: compensation per employee . . . . .	91
Graph 50 — Convergence of NMS with the EU-15: labour productivity . . . . .	92
Graph 51 — Convergence of NMS with the EU-15: nominal unit labour costs . . . . .	92
Graph 52 — Convergence of NMS with the EU-15: real unit labour costs. . . . .	93
Graph 53 — Breakdown of nominal unit labour costs into compensation per employee and labour productivity, NMS. . . . .	93
Graph 54 — Breakdown of real unit labour costs into nominal unit labour costs and the GDP deflator, NMS . . . . .	94
Graph 55 — Nominal and real unit labour costs, NMS . . . . .	95
Graph 56 — Comparison of employment and real compensation per employee in NMS and EU-15, 1995–2006 . . . . .	98
Graph 57 — Nominal compensation per employee in manufacturing and services, NMS . . . . .	99
Graph 58 — Labour productivity in manufacturing and services, NMS . . . . .	99
Graph 59 — NULC differential between manufacturing and services, NMS . . . . .	100
Graph 60 — Elasticity of employment to GDP growth: recursive estimates. . . . .	109
Graph 61 — Evidence of grease effects at low level of inflation. . . . .	109
Graph 62 — Growth of relative wages, relative productivity and relative value added, 1992–98 . . . . .	114
Graph 63 — Growth of the component of relative unit labour cost and of relative value, 1999–2004 . . . . .	115
Graph 64 — Box plot of the annual average growth rate (%) of relative unit labour costs in manufacturing, euro-area countries. . . . .	117
Graph 65 — Box plot of the annual average growth rate (%) of relative unit labour costs in services, euro-area countries . . . . .	118
Graph 66 — The distribution of relative wage changes for selected euro-area countries . . . . .	120
Graph 67 — Number of industries with cuts in relative wages . . . . .	124
Graph 68 — Volatility of common and sector-specific component. . . . .	132
