

CONTENTS

Summary and main conclusions	1
Part I: Current developments and prospects	9
Summary	11
1. Budgetary developments in the euro area and the EU Member States	13
1.1. Short-term developments and prospects for the budget balance and public debt	13
1.2. Government revenue and expenditure	15
1.3. The fiscal stance and policy mix in the euro area	16
2. Implementing the Stability and Growth Pact	23
2.1. Introduction	23
2.2. The excessive deficit procedure	23
2.3. The Commission policy advice	33
3. Overview of the 2007/08 updates of the stability and convergence programmes	37
3.1. Introduction	37
3.2. Plans and outcomes in 2007	37
3.3. Plans for 2008 and 2009 – Slowing consolidation	42
3.4. Debt developments	43
3.5. Risks to the achievement of plans	44
4. The long-term sustainability of public finances based on the 2007/08 updates of the stability and convergence programmes	56
4.1. Introduction	56
4.2. Projections of the budgetary impact of ageing populations	56
4.3. Sustainability gaps	58
4.4. The required primary balance	64
4.5. Qualitative considerations	64
4.6. Overall assessment of the sustainability challenge in the Member States	66
Part II: Evolving budgetary surveillance	69
Summary	71
1. The quality of public finances: data, indicators and more	74
1.1. Introduction	74
1.2. Indicators of quality of public finances: where we are and where we go	74
1.3. Reporting on quality of public finances in stability and convergence programmes: taking stock and looking forward	80
1.4. Gauging productivity in the government sector: current practice and scope for improvement	85
2. Measuring and assessing fiscal developments	94
2.1. Fiscal indicators: improving the estimation of the structural budget balance	94
2.2. Medium-term budgetary objectives and implicit liabilities: a new synthesis	106

2.3.	No-policy-change scenarios of fiscal policy: bringing together key principles	109
All.	Measuring and assessing fiscal developments	116
All.1.	Assessing alternative real-time output gap estimates	116
All.2.	Modelling time-varying tax elasticities	118
All.3.	Recording of taxes and social contributions in ESA95 accounts	121
Part III:	The quality of public finances and growth: a conceptual framework	125
	Summary	127
1.	Introduction	129
2.	A multi-dimensional conceptual framework	131
2.1.	Defining the quality of public finances	131
2.2.	Economic Growth and the multiple dimensions of quality of public finances	131
3.	The multiple dimensions of quality of public finances	134
3.1.	The size of government	134
3.2.	Fiscal deficits and sustainability	137
3.3.	The composition and efficiency of expenditure	138
3.4.	Structure and efficiency of revenue systems	145
3.5.	Fiscal governance	148
3.6.	Market efficiency and business environment	151
3.7.	Conclusions	155
4.	The quality of public finances: some stylised facts	156
4.1.	Quality of public finances and growth in the long run	156
4.2.	Opening the black-box: quality of public finances and the components of economic growth	159
4.3.	Summary and future research	165
Alll.	Canonical discriminant analysis	166
Part IV:	The efficiency of tax systems	167
	Summary	169
1.	The case for efficiency-enhancing tax reforms in Europe	171
1.1.	Introduction	171
1.2.	The structure of taxation in the EU	172
1.3.	Challenges for tax policy	177
1.4.	Recent reform experiences and policy debate	179
2.	Efficient tax systems and the shift from labour to consumption taxation	183
2.1.	Elements of efficiency-enhancing tax reforms	183
2.2.	Shifting from income to consumption taxation	185
3.	A tax shift from labour to consumption in the euro area: simulation results	193
3.1.	The QUEST III model	193
3.2.	Simulating a tax shift from labour to consumption	193
3.3.	Simulation scenarios	198
4.	Conclusions	204

Part V:	Member State developments	207
	1. Belgium	208
	2. Bulgaria	210
	3. The Czech Republic	212
	4. Denmark	214
	5. Germany	217
	6. Estonia	219
	7. Ireland	221
	8. Greece	223
	9. Spain	225
	10. France	228
	11. Italy	231
	12. Cyprus	234
	13. Latvia	236
	14. Lithuania	238
	15. Luxembourg	241
	16. Hungary	244
	17. Malta	247
	18. The Netherlands	250
	19. Austria	252
	20. Poland	254
	21. Portugal	257
	22. Romania	259
	23. Slovenia	261
	24. Slovakia	264
	25. Finland	267
	26. Sweden	269
	27. United Kingdom	271
Part VI:	Resources	275
	1. Abbreviations and symbols used	276
	2. Glossary	279
	3. References	287
	4. Useful internet links	300

LIST OF TABLES

I.1.1.	Budget balances in EU Member States (% of GDP)	14
I.1.2.	Euro area - The general government budget balance (% of GDP)	15
I.1.3.	Composition of changes in the government debt ratio in EU Member States (% of GDP)	16
I.1.4.	Euro area - Government revenue and expenditures (% of GDP)	17
I.2.1.	Overview EDP-steps since spring 2007 – Euro-area Member States	35
I.2.2.	Overview EDP-steps since spring 2007 – Non-euro area Member States	36

I.3.1.	Government balances in 2006 and 2007 (% of GDP)	37
I.3.2.	Budgetary developments in the Member States according to the 2007 stability and convergence programme updates	46
I.3.3.	Overview of the Council Opinions on the SCPs - Summary assessments and policy invitations	47
I.4.1.	Projected changes in gross total age-related public expenditure and property income between 2010 and 2030/50 (% of GDP)	57
I.4.2.	Results of the sustainability gap calculations in the '2007 scenario' (% of GDP)	60
I.4.3.	Results of the sustainability gap calculations in the 'programme scenario' (% of GDP)	62
I.4.4.	Projected debt developments in the EU Member States (% of GDP)	63
I.4.5.	Required primary balance (% of GDP)	64
II.1.1.1.	Examples of potential indicators for assessing the quality of public finances and to construct composite indicators (Part I)	76
II.1.1.2.	Examples of potential indicators for assessing the quality of public finances and to construct composite indicators (Part II)	77
II.1.1.3.	A stylised example: elements of quality of public finance composite indicators	79
II.1.1.4.	Reporting on quality of public finances in the stability and convergence programmes	83
II.2.1.	Accuracy statistics of real time output gap estimates for 2000-2006. Benchmark: Commission services' spring 2008 forecast	98
II.2.2.	Implementation of the no-policy-change assumption: government revenues	115
II.All.1.	Definition of GDP slope dummies used in regression analysis	119
II.All.2.	Total current taxes - Detailed estimation results of error correction models	120
II.All.3.	Accounting treatment of taxes in ESA95	124
III.1.1.1.	Key European and ECOFIN Council statements on the role of quality of public finances, 2000-2007	130
III.3.1.	Changes in the expenditure-to-GDP ratio between 1980-1985 and 2003-2007	135
III.3.2.	Empirical evidence for Wagner's Law: a summary of findings	135
III.3.3.	Empirical findings on the link between government size and growth: a survey of recent studies	137
III.3.4.	Estimates for education spending efficiency	144
III.3.5.	Estimates for health spending efficiency	144
III.3.6.	Influence of fiscal rules on the primary cyclically adjusted balance, EU-25, 1990-2005	149
III.3.7.	The role of medium-term budgetary frameworks in sticking to expenditure plans	150

III.3.8.	Key features of independent fiscal agencies in the EU, 2005	151
III.4.1.	Growth and the quality of public finances: selected indicators for the EU and OECD countries	157
III.4.2.	The sources of growth and the quality of public finances, 1990-2004	162
IV.1.1.	EU-27 (weighted average): Total taxes (incl. social security contributions) and tax structure, % of GDP, 1995-2006	176
IV.3.1.	Simulation of a euro-area wide tax shift	199
IV.3.2.	Simulation of a tax shift by Germany only	201
IV.3.3.	Simulation of a tax shift by Ireland only	202
IV.3.4.	Sensitivity analysis, selected results (tax shift in Germany)	203
V.1.1.	Budgetary developments 2006-2011, Belgium (% of GDP)	209
V.1.2.	Main measures in the budget for 2008, Belgium	209
V.2.1.	Budgetary developments 2006-2010, Bulgaria (% of GDP)	211
V.2.2.	Main measures in the budget for 2008, Bulgaria	211
V.3.1.	Budgetary developments 2006-2011, Czech Republic (% of GDP)	213
V.3.2.	Main measures in the budget for 2008, Czech Republic	213
V.4.1.	Budgetary developments 2006-2011, Denmark (% of GDP)	215
V.4.2.	Main measures in the budget for 2008, Denmark	215
V.4.3.	Elements and structure of the 2015-plan	216
V.5.1.	Budgetary developments 2006-2011, Germany (% of GDP)	218
V.5.2.	Main measures in the budget for 2008, Germany	218
V.6.1.	Budgetary developments 2006-2011, Estonia (% of GDP)	220
V.6.2.	Main measures in the budget for 2008, Estonia	220
V.7.1.	Budgetary developments 2006-2011, Ireland (% of GDP)	222
V.7.2.	Main measures in the budget for 2008, Ireland	222
V.8.1.	Budgetary developments 2006-2010, Greece (% of GDP)	224
V.8.2.	Main measures in the budget for 2008, Greece	224
V.9.1.	Budgetary developments 2006-2010, Spain (% of GDP)	226
V.9.2.	Main measures in the April fiscal package and in the budget for 2008, Spain	226
V.9.3.	Migrants' contribution to public finance (% of GDP)	227
V.10.1.	Budgetary developments 2006 - 2012, France (% of GDP)	230
V.10.2.	Main measures in the TEPA package and in the budget for 2008, France	230
V.11.1.	Budgetary developments 2006-2011, Italy (% of GDP)	232
V.11.2.	Main measures in the budget for 2008, Italy	232
V.12.1.	Budgetary developments 2006-2011, Cyprus (% of GDP)	235
V.12.2.	Main measures in the budget for 2008, Cyprus	235
V.13.1.	Budgetary developments 2006-2010, Latvia (% of GDP)	237
V.13.2.	Main measures in the budget for 2008, Latvia	237
V.14.1.	Budgetary developments 2006-2010, Lithuania (% of GDP)	239
V.14.2.	Main measures in the budget for 2008, Lithuania	239
V.15.1.	Budgetary developments 2006-2010, Luxembourg (% of GDP)	242
V.15.2.	Main measures in the budget for 2008, Luxembourg	242
V.16.1.	Budgetary developments 2006-2011, Hungary (% of GDP)	245

V.16.2.	Main measures in the budget for 2008, Hungary	245
V.17.1.	Budgetary developments 2006-2011, Malta (% of GDP)	249
V.17.2.	Main measures in the budget for 2008, Malta	249
V.18.1.	Budgetary developments 2006-2010, the Netherlands (% of GDP)	251
V.18.2.	Main measures in the budget for 2008, the Netherlands	251
V.19.1.	Budgetary developments 2006-2010, Austria (% of GDP)	253
V.19.2.	Main measures in the budget for 2008, Austria	253
V.20.1.	Budgetary developments 2006-2010, Poland (% of GDP)	256
V.20.2.	Main measures in the budget for 2008, Poland	256
V.21.1.	Budgetary developments 2006-2011, Portugal (% of GDP)	258
V.21.2.	Main measures in the budget for 2008, Portugal	258
V.22.1.	Budgetary developments 2006-2010, Romania (% of GDP)	260
V.22.2.	Main measures in the budget for 2008, Romania	260
V.23.1.	Budgetary developments 2006-2010, Slovenia (% of GDP)	263
V.23.2.	Main measures in the budget for 2008, Slovenia	263
V.24.1.	Budgetary developments 2006-2010, Slovakia (% of GDP)	266
V.24.2.	Main measures in the budget for 2008, Slovakia	266
V.25.1.	Budgetary developments 2006-2011, Finland (% of GDP)	268
V.25.2.	Main measures in the budget for 2008, Finland	268
V.26.1.	Budgetary developments 2006-2011, Sweden (% of GDP)	270
V.26.2.	Main measures in the budget for 2008, Sweden	270
V.27.1.	Budgetary developments 2006/07-2012/13, United Kingdom (% of GDP)	272
V.27.2.	Main measures in the 2007 pre-budget report and the 2008 budget, United Kingdom	272

LIST OF GRAPHS

I.1.1.	Euro-area fiscal stance and output gap	17
I.1.2.	Euro-area fiscal stance and output gap change	18
I.1.3.	Policy-mix in the euro area	18
I.3.1.	Budget balance in 2006 SCP plans for 2007 and outcomes: composition of differences (% of GDP)	38
I.3.2.	Apparent tax elasticities in the EA-15 and the EU-27	39
I.3.3.	Planned change in the structural balance - Unweighted average per group	42
I.3.4.	Planned change in the structural balance of Member States in EDP at the start of 2008 (% of GDP)	42
I.3.5.	Composition of the planned change in the budgetary position 2007-2010 (% of GDP)	43
I.3.6.	Capacity utilisation and output gap in the euro area	44
I.3.7.	Debt-to-GDP ratio 2007 and 2010 (% of GDP)	45
I.4.1.	Overall risk classification and the sustainability gap (\$2 in the 2007 scenario)	67
II.1.1.	A stylised example: reviewing the QPF in EU Member States with simple composite indicators	80
II.2.1.	Assessment of cyclical conditions using alternative methods: Netherlands, 2000-2006	99

II.2.2.	Assessment of cyclical conditions using alternative methods: Italy, 2000-2006	99
II.2.3.	Assessment of cyclical conditions using alternative methods: Greece, 2000-2006	99
II.2.4.	Sources of variations in tax elasticities: Germany	101
II.2.5.	Sources of variations in tax elasticities: France	101
II.2.6.	Sources of variations in tax elasticities: Italy	101
II.2.7.	Sources of variations in tax elasticities: United Kingdom	101
II.2.8.	Impact of composition effects on the change in the budget balance in Germany, 1996-2007	104
II.2.9.	Impact of composition effects on the change in the budget balance in Italy, 1996-2007	104
II.2.10.	Impact of composition effects on the change in the budget balance in France, 1996-2007	104
II.2.11.	Impact of composition effects on the change in the budget balance in the Netherlands, 1996-2007	104
II.2.12.	Impact of composition effects on the change in the budget balance in the United Kingdom, 1996-2007	106
III.2.1.	The quality of public finances - A multi-dimensional framework	132
III.3.1.	Size of government and income for EU Member States and non-EU industrial countries, average 2003-2007	135
III.3.2.	Government size and economic growth, 1980-2007	136
III.3.3.	Level of debt size and economic growth, 1980-2007	138
III.3.4.	Level of public debt and size of governments, 2003-2007	138
III.3.5.	Public investment and economic growth in the EU17 and non-EU industrial countries, 1995-2007	139
III.3.6.	Share of 'productive' public spending in primary public spending, 2005	140
III.3.7.	The concepts of efficiency and effectiveness	141
III.3.8.	Public expenditure on primary and secondary education and education attainment	143
III.3.9.	Marginal tax wedge on labour income, 2007	146
III.3.10.	Structure of public revenues, 2002-2007	147
III.3.11.	Share of direct taxation and social security contribution in total public revenues (%)	147
III.3.12.	Administrative burden of tax systems, 2007	148
III.3.13.	Fiscal rules index in the EU	149
III.3.14.	Fiscal rules index and budgetary performance, 1995-2007	149
III.3.15.	Quality of medium-term budgetary frameworks and fiscal rules	150
III.3.16.	Public spending on general services, 2005	152
III.3.17.	'Wastefulness' of government spending, 2007	152
III.4.1.	Public spending in health and GDP per capita growth rate, 1980-2005	158
III.4.2.	Change in mortality rate and GDP per capita growth rate, 1980-2005	158
III.4.3.	Public spending in education and GDP per capita growth rate, 1980-2000	159
III.4.4.	Changes in secondary and higher education attainment and GDP per capita growth, 1980-2000	159

III.4.5.	GDP growth decomposition, 1996-2004	160
III.4.6.	Contribution of capital to GDP growth: high public debt versus low public debt countries	163
III.4.7.	Contribution of capital to GDP growth: most flexible versus least flexible markets countries	163
III.4.8.	Contribution of skilled labour to GDP growth: high versus low public education spending (% of GDP)	164
III.4.9.	Contribution of skilled labour to GDP growth: high versus low education attainment level	164
III.4.10.	Contribution of skilled labour to GDP growth: flexible versus rigid labour markets	164
III.4.11.	Contribution of total factor productivity to GDP growth: flexible versus rigid markets counties	165
IV.1.1.	Total taxes (incl. social security contributions), % of GDP	172
IV.1.2.	Evolution of total taxes (incl. social security contributions) in Europe 1970-2006	173
IV.1.3.	Direct taxes, indirect taxes and social security contributions (SSC), 1970-2006	174
IV.1.4.	Share of indirect taxes in tax revenues, 2006	176
IV.1.5.	Share of direct taxes in tax revenues, 2006	176
IV.1.6.	Share of social security contributions in tax revenues, 2006	176
IV.1.7.	Taxes on capital, 1995-2006 averages	177
IV.1.8.	Taxes on labour, 1995-2006 averages	177
IV.1.9.	Taxes on consumption, 1995-2006 averages	177
IV.1.10.	Marginal tax wedges on labour, 2007	179
IV.1.11.	Change in the share of tax revenues (% of GDP) from components of labour taxation, 1995-2006 (pp change)	182
V.9.1.	Impact of immigration on economic growth	227
V.14.1.	Lithuania - General government expenditure and revenue (% of GDP)	240
V.16.1.	Past evidence of electoral cycle in Hungarian public finances	246
V.20.1.	Pensions and social benefits in Poland, general system plus KRUS (number of accounts, in millions)	255
V.20.2.	Employment in agriculture and farmers' social security fund (KRUS) membership (number of people, in millions)	255
V.27.1.	Public sector spending by function, 1997/98, 2001/02 and 2006/07 (% of GDP)	273

LIST OF BOXES

I.1.1.	Does discretionary fiscal stabilisation warrant a comeback in the EU?	19
I.2.1.	EU budgetary surveillance	24
I.3.1.	Expenditure slippage is a recurrent theme	40
II.1.1.	Convergence between output and input methods	92
II.2.1.	How the budget balance is adjusted for cyclical factors in the EU fiscal surveillance framework	96
II.2.2.	Gauging the size of composition effects	105
III.3.1.	Approaches to estimate efficiency	142

III.3.2.	Performance-based budgeting - A summary of EU Member States experiences	153
III.4.1.	Growth-accounting analysis	161
IV.1.1.	Shifting taxes from labour to consumption. The case of Germany	175
IV.1.2.	Taxes and labour market outcomes	180
IV.2.1.	The VAT - A European success showing signs of age	191
