

Table of contents

1. Introduction	11
2. Overview of the LIME assessment framework (LAF)	11
2.1. <i>Presentation of the main steps</i>	<i>11</i>
2.2. <i>Underlying assumptions and approaches</i>	<i>13</i>
2.3. <i>The value-added, caveats and limitations of LAF.....</i>	<i>15</i>
3. Description of the LIME assessment framework (LAF)	16
3.1. <i>The assessment of GDP components</i>	<i>16</i>
3.1.1. <i>The GDP decomposition</i>	<i>16</i>
3.1.2. <i>A closer look at the decomposition of GDP in level and growth.....</i>	<i>18</i>
3.1.3. <i>Specific considerations in the GDP decomposition</i>	<i>22</i>
3.2. <i>Assessing the performance policy areas affecting GDP.....</i>	<i>24</i>
3.2.1. <i>The assessment of performance of policy areas.....</i>	<i>24</i>
3.2.2. <i>The choice of LAF policy areas and their coverage.....</i>	<i>27</i>
3.2.3. <i>The choice of indicators.....</i>	<i>29</i>
3.2.4. <i>The reliability of the indicator based assessment in each policy areas</i>	<i>31</i>
3.3. <i>The link between underperformance in policy areas and relevant GDP components</i>	<i>33</i>
ANNEX I: a closer look at GDP accounting and cyclical adjustment.....	35
1. GDP decomposition.....	36
1.1. <i>Presentation of the GDP breakdown in levels and changes</i>	<i>36</i>
1.2. <i>Caveats and limitations</i>	<i>40</i>
1.3. <i>Can government policies impact the GDP components?.....</i>	<i>41</i>
1.4. <i>Computing a comparable indicator of labour quality: the initial education of labour</i>	<i>42</i>
2. Taking account of the business cycle	44
2.1. <i>Cyclical-adjustment: a hybrid model with output gap and change in output gap</i>	<i>44</i>
2.2. <i>The result of the cyclical adjustment</i>	<i>46</i>
ANNEX II: Survey of the literature on the effects and the channels of transmission of structural reforms - choice of indicators	49
1. Introduction	51
2. Labour market.	53
2.1. <i>Active labour market policies.</i>	<i>53</i>
2.2. <i>Making work-pay: interplay of tax and benefit system</i>	<i>59</i>
2.3. <i>Labour taxation to stimulate labour demand.....</i>	<i>68</i>
2.4. <i>Job protection and labour market segmentation/dualisation</i>	<i>73</i>
2.5. <i>Policies increasing working time.....</i>	<i>80</i>
2.6. <i>Specific labour supply measures for women.....</i>	<i>85</i>

2.7.	<i>Specific labour supply measures for older-workers</i>	95
2.8.	<i>Wage bargaining and wage setting policies</i>	101
2.9.	<i>Immigration and integration policies</i>	109
2.10.	<i>Labour market mismatch and labour mobility</i>	117
3.	Product and capital market regulations	123
3.1.	<i>Competition policy framework</i>	123
3.2.	<i>Sector specific regulation (telecom, energy)</i>	130
3.3.	<i>Business environment – Regulatory barriers to entrepreneurship</i>	138
3.4.	<i>Start-up conditions</i>	147
3.5.	<i>Financial markets and access to finance</i>	153
3.6.	<i>Market integration - Openness to trade and investment</i>	165
4.	Innovation and knowledge	177
4.1.	<i>R&D and innovation</i>	177
4.2.	<i>ICT</i>	188
4.3.	<i>Education and life-long learning</i>	193
5.	Macroeconomy	204
5.1.	<i>Orientation and sustainability of public finances</i>	204
6.	Other	213
6.1.	<i>Macroeconomic background information</i>	213
ANNEX III: robustness check and sensitivity analysis of the scores used for the assessment in LAF		219
1.	Introduction	221
2.	How robustness and sensitivity are assessed ?	223
3.	Robustness analysis between the assessments of country performance using different numbers of indicators	223
4.	Robustness check of the method used for the calculation of the aggregate score by policy area	225
4.1.	<i>Min Max method</i>	226
4.2.	<i>Average country rankings</i>	226
4.3.	<i>Benefit-of-the-doubt</i>	226
4.4.	<i>Random weights</i>	226
