

## TABLE OF CONTENT

<b>Introduction (G. Mahieu, M. Suardi)</b> .....	<b>7</b>
Background.....	7
The papers and discussions .....	8
Conclusions .....	9
<b>Forces Driving Inflation in the New EU10 Members (E. Stavrev)</b> .....	<b>11</b>
1    Introduction .....	12
2    Related Literature.....	12
3    Inflation Dynamics in MNS: Background.....	13
4    Methods and Data.....	16
4.1    Generalised Dynamic Factor Model .....	17
4.2    Modeling common and country specific components .....	18
4.3    Data description.....	19
5    Discussion of the Results.....	19
5.1    GDFM Results .....	19
5.2    Determinants of common and country-specific inflation .....	22
6    Concluding Remarks.....	23
References.....	24
<b>Vulnerability of inflation in the new EU Member States to country-specific and global factors (J. Beirne)</b> .....	<b>25</b>
1    Introduction .....	26
2    Inflation in the Central and Eastern European countries.....	26
3    Data and Methodology.....	28
4    Preliminary Analysis.....	29
5    Empirical Results .....	30
6    Conclusions .....	33
References.....	34

<b>Inflation in the New EU Countries from Central and Eastern Europe: Theories and Panel Data Estimations (K. Staehr)</b> .....	<b>35</b>
1 Introduction .....	36
2 Theories of inflation and empirical results for the CEE countries.....	37
2.1 Explaining inflation.....	37
2.2 Some empirical results for the CEE countries .....	40
3 Data and empirical methodology.....	41
3.1 Inflation theories and variables .....	41
3.2 Methodological issues .....	43
4 Separate testing of explanatory factors.....	45
5 More explanatory variables.....	50
5.1 Full sample .....	50
5.2 Different subsamples .....	52
6 Final comments.....	53
Appendix .....	55
Literature.....	56
<b>Catching-up and transition related inflation (B. Égert)</b> .....	<b>59</b>
1 Introduction .....	60
2 Stylised facts .....	60
2.1 The overall picture .....	60
2.2 Market-based service prices: The Balassa-Samuleson effect.....	62
2.3 Regulated services .....	63
2.4 Goods prices.....	63
3 Estimation framework: Bayesian averaging of classical estimates (BACE).....	64
4 Variable selection and data issues.....	65
5 Results .....	67
6 Conclusions .....	69
References.....	70

<b>Catching-up and inflation in transition economies: the Balassa-Samuelson effect revisited (D. Mihaljek, M. Klau)</b> .....	<b>71</b>
1 Introduction .....	72
2 Analytical framework .....	74
3 Productivity and inflation in tradable and non-tradable sectors .....	76
4 Econometric estimates of the balassa-samuelson effects .....	79
5 Concluding remarks .....	84
Appendix .....	86
References .....	91

<b>The Role of Inflation Persistence in the Inflation Process in the New EU Member States (M. Franta, B. Saxa, K. Šmídková)</b> .....	<b>93</b>
1 Introduction .....	94
2 Related literature .....	96
3 Stylised facts and models for estimating inflation persistence .....	98
3.1 Description of data used in this study .....	98
3.2 Some stylized facts: inflation in the NMS .....	99
3.3 Time-varying mean model .....	100
3.4 ARFIMA model .....	102
4 Results .....	103
4.1 Time-varying mean model .....	103
4.2 The ARFIMA model .....	107
5 Conclusions .....	109
References .....	110
Appendix 1: Inflation plots .....	113
Appendix 2: Complete estimation results of time-varying mean model .....	116
Appendix 3: Perceived inflation targets .....	123

<b>Inflation forecasting in the New EU Member States (O. Arratibel, C. Kamps, N. Leiner-Killinger)</b> .....	125
Non-technical summary .....	126
1 Introduction .....	127
2 Inflation developments and inflation forecasts in the NMS: stylised facts.....	128
2.1 Non-monetary determinants of inflation in the new EU Member States .....	130
2.2 Monetary determinants of inflation in the new EU Member States .....	132
3 The empirical framework.....	133
3.1 Data .....	133
3.2 Methodology .....	134
4 Empirical results.....	137
4.1 Short-term forecast of inflation developments (4 quarters ahead).....	137
4.2 Long-term forecast of inflation developments (12 quarters ahead) .....	140
5 Conclusions .....	143
References.....	144
Appendix .....	145
