

CONTENTS

Summary and main findings	1
Part I: Labour market developments	5
1. Labour market conditions in the euro area and the EU	6
1.1. Introduction	6
1.2. Setting the scene: the EU labour market in an international perspective	6
1.3. Employment and unemployment	8
1.4. Wages and labour costs	12
1.5. Labour market matching and long-term unemployment	14
1.6. Conclusions	18
2. Employment developments at country level	20
2.1. Introduction	20
2.2. employment developments and unemployment rates	20
2.3. Employment, participation, hours worked	24
2.4. job market flows and Long-term unemployment	26
2.5. Labour market status of different groups	27
2.6. Policy developments	33
2.7. Conclusions	37
3. Wage developments at country level	38
3.1. Introduction	38
3.2. Trends in wages	38
3.3. Trends in unit labour costs	45
3.4. Price competitiveness developments	47
3.5. Policy developments	51
3.6. Conclusion	53
4. EU labour market outlook	55
Part II: Unemployment benefit systems: reform challenges after the crisis	59
1. Introduction	60
2. Unemployment benefit systems and labour market incentives	61
2.1. The relevance of unemployment benefit design for incentives	61
2.2. Main features of unemployment benefit systems in EU countries	64
3. Unemployment benefits and income stabilisation	70
3.1. The income smoothing properties of unemployment benefit systems	70
3.2. Adapting the generosity of unemployment benefits over the cycle	73
4. Unemployment benefit reforms during the crisis	76
5. Conclusions	79
Part III: Wage setting, price competitiveness, macroeconomic imbalances	81
1. Introduction	82
2. Labour cost developments, price competitiveness and macroeconomic imbalances	83

2.1.	Labour cost developments as competitiveness shocks	83
2.2.	Market-driven labour cost adjustment	84
2.3.	The relevance of supportive wage developments for the adjustment of external imbalances	85
3.	Assessing aggregate wage developments	86
3.1.	Benchmarking labour cost developments	86
3.2.	Unit labour costs and price competitiveness developments across EU countries	89
4.	Government policies and labour cost developments	91
4.1.	Government policies and regulation affecting labour costs	91
4.2.	The role of the wage bargaining system	93
5.	Conclusions	99
A.1.	Estimating wage equations	101
A.2.	Description of ICTWSS indicators	103
A.3.	Regression analysis results	104
	Statistical Annex	125
A.1.	Statistical annex	126
A.2.	Policy indicators	155
	References	169

LIST OF TABLES

I.1.1.	GDP growth and unemployment in selected countries	6
I.1.2.	Unemployment, compensation per employee and GDP growth in the euro area and European Union	7
I.1.3.	Employment and value added in sectors	9
I.1.4.	Labour costs by sector	14
I.2.1.	Employment growth in different sectors: 2008Q1-2010Q4 (in %)	26
I.2.2.	Employment rates by country and gender	28
I.2.3.	Employment, participation and unemployment rates by age EU 27	28
I.2.4.	Employment, participation and unemployment rates by education EU-27	29
I.2.5.	Unemployment rates of the low skilled by country	30
I.2.6.	Share of temporary employees by age EU-27	31
I.2.7.	Distribution of contract types among the employed in % by country	31
I.2.8.	Part-time and full-time employment EU 27	31
I.3.1.	Compensation per hour worked, y-o-y % change	41
I.3.2.	Decomposition of unit labour costs, y-o-y % change, 2010	45
I.3.3.	Contributions to the final demand deflator, y-o-y % change, 2010	46
I.3.4.	Decomposition of the tax wedge	47
I.4.1.	Employment growth and unemployment rate forecasts by EU Commission (DG ECFIN), OECD and IMF	56
II.2.1.	Unemployment benefit generosity over the unemployment spell, average wage person, 2009	64
II.2.2.	Unemployment benefit generosity over the unemployment spell, low wage person, 2009	65
II.2.3.	Unemployment traps, 2009	66

II.2.4.	Threshold values for minimum and maximum unemployment benefits, 2009	67
II.3.1.	Income stabilisation in case of unemployment shock, 2008	70
II.4.1.	Policy measures in EU countries, 2008Q2 – February 2010	77
III.4.1.	Wage bargaining characteristics	95
III.4.2.	Correlations among wage bargaining characteristics, EU27, 1995-2007	96
III.A2.1.	Description of ICTWSS indicators of wage setting institutions	103
III.A3.1.	Wages and institutions: evidence from long-run wage equations, various samples, 1980-2007	117
III.A3.2.	Wages and institutions: evidence from Error Correction Models, various samples, 1980-2007	118
III.A3.3.	Wages and institutions: evidence from cross section regressions, 1995-2007	119
III.A3.4.	Wages and institutions: evidence from long-run wage equations, various sample splits, EU27, 1980-2007	120
III.A3.5.	Wages and institutions: evidence from Error Correction Models, various sample splits, EU27, 1980-2007	121
III.A3.6.	The role of social pacts: evidence from long-run wage equations, EU27, 1980-2007	122
III.A3.7.	Long-run wage equations, various sample, 1980-2007	123
III.A3.8.	Wage equations, Error Correction Model, various sample, 1980-2007	124

LIST OF GRAPHS

I.1.1.	Unemployment rates in EU	7
I.1.2.	Employment and GDP growth in the EU	8
I.1.3.	Real wages and productivity growth in the euro area and selected advanced countries	8
I.1.4.	Okun's law in the euro area and the United States	9
I.1.5.	United States – cumulative decline in GDP, number of employees and average hours worked per employee	10
I.1.6.	Euro area – cumulative decline in GDP, number of employees and average hours worked per employee	10
I.1.7.	Employment, unemployment and participation rates in the EU and the euro area	10
I.1.8.	Wage growth and unemployment in the euro area	12
I.1.9.	Phillips curve for the euro area 2000-2010: growth of negotiated wages	12
I.1.10.	Phillips curve of the euro area 2000-2010: growth of compensation per employee	13
I.1.11.	Net earnings and labour costs: euro area	13
I.1.12.	Compensation per employee and unit labour costs in the euro area	13
I.1.13.	Euro area competitiveness indicators	14
I.1.14.	Job finding and job separation rates in the euro-area, 2000q2-2010q4	15
I.1.15.	Short-term and long-term unemployment in the EU, 1998-2010	15
I.1.16.	Percentage of the labour force jobless for 1 year or more, 2005Q1-2011Q1	16
I.1.17.	Beveridge curve euro-area: 1995q1-2011q1	16
I.1.18.	Shifts in the euro-area Beveridge curve and NAIRU (cumulated changes since 1996)	16
I.2.2.	Unemployment in the euro area countries: percentage share of total euro area unemployment	21
I.2.3.	Changes in the unemployment rate (2008Q1-2010Q4, in pps): actual and Okun's Law prediction	21

I.2.4.	GDP and employment growth in the EU (changes over the period 2008Q2-2010Q4)	23
I.2.5.	Cumulative change in employment and participation rates (2008Q1 to 2010Q4) %	24
I.2.6.	Change in total hours worked (cumulative changes since 2008Q1)	25
I.2.7.	Unemployment duration in months before, during and after the recession	26
I.2.8.	Job finding rates – the probability of leaving unemployment has fallen during the crisis and remains low	27
I.2.9.	Job separation rates – the probability of losing a job remains high in many Member States	27
I.2.10.	Male employment, participation and unemployment rates in the EU	27
I.2.11.	Female employment, participation and unemployment rates in the EU	28
I.2.13.	Employment rates changes by age group in the EU	28
I.2.12.	Youth unemployment rates by country (age 15-24)	29
I.2.14.	Employment growth by nationality EU-27	30
I.2.15.	Employment growth by contract type EU-27	30
I.2.16.	Number of reforms taken since the outbreak of the crisis	35
I.2.17.	Number of countries announcing reforms	36
I.3.1.	Nominal compensation per employee, y-o-y % change	39
I.3.2.	Compensation per employee, y-o-y % change vs level of compensation in PPS, 2010	39
I.3.3.	Compensation per employee, y-o-y % change	40
I.3.4.	Compensation per employee, HICP and GDP deflator, y-o-y% change, 2010	42
I.3.5.	Real compensation per employee and productivity, average growth rates 2008-2010	42
I.3.6.	Real compensation per employee, y-o-y % change 2010 and unemployment rate 2009	43
I.3.7.	RULC, y-o-y % change 2010 and unemployment rate in 2009	43
I.3.8.	Compensation per employee by sector, y-o-y % change, 2010	44
I.3.9.	Compensation per employee in private and public sector, y-o-y % change, 2010	45
I.3.10.	REERs based on ULC deflator, GDP deflator and export prices deflator, y-o-y % change, 2010	48
I.3.11.	REERs based on ULC, y-o-y % change, 2008Q1-2010Q4	49
I.3.12.	Level of REERs based on ULC (2000=100) and y-o-y % change, 2010	50
I.3.13.	REERs based on ULC and NEERs, y-o-y % change, 2010	50
I.3.14.	REERs based on ULC, y-o-y % change, and relative output gap, 2010	51
I.3.15.	REERs based on ULC, y-o-y % change, and current account balance, 2010	51
I.3.16.	Number of countries announcing reforms	53
I.4.1.	Business climate indicator and employment growth in the EU (2000Q1-2011Q1)	55
I.4.2.	Employment expectations in the EU business surveys (industry, construction and services)	56
I.4.3.	Unemployment developments (left axis) and apparent elasticities of unemployment change to GDP growth (right axis) in the EU countries and in the US in 2011 and 2012	57
I.4.4.	Nominal compensation per employee in EU Member States	57
I.4.5.	Nominal unit labour costs in the euro area	57
II.2.1.	Maximum duration of unemployment insurance benefits and long term unemployment	63
II.2.2.	Minimum and maximum unemployment insurance benefit duration, 2009	67
II.2.3.	Net replacement rate of unemployed over the unemployment spell (unemployment benefits only), 2009	68

II.2.4.	Net replacement rate of unemployed over the unemployment spell (unemployment benefits topped up with social assistance and housing benefits), 2009	68
II.2.5.	Net replacement rate and activation strategies	69
II.3.1.	Net replacement rates and income stabilisation	71
II.3.2.	Average sentiments of the unemployed and net replacement rate	71
II.3.3.	Generosity of short-time working schemes and unemployment benefits	72
II.3.4.	Access of temporary workers to unemployment benefits	72
II.3.5.	Access of the self-employed to unemployment benefits	72
II.4.1.	Change in net replacement rates (unemployment benefits only) in the first year of unemployment over the period 2007 and 2009	76
II.4.2.	Change in the maximum unemployment insurance benefits duration over the period 2007 and 2009	77
II.4.3.	Change in the minimum unemployment insurance benefits duration over the period 2007 and 2009	78
III.2.1.	Changes in REER and in current account balance, euro area, 1999-2007	83
III.2.2.	Current account semi-elasticities	84
III.2.3.	Changes in REER and output gaps in current account balance, euro area, 1999-2007	84
III.3.1.	REER and unit labour cost growth rates	89
III.4.1.	Growth gap between compensation per employee in public and private sectors	92
III.4.2.	Minimum wages and compensation per employee	92
III.4.3.	Tax burden on labour and labour costs	93
III.4.4.	Level of bargaining and growth in real unit labour costs, EU27, average 1995-2007	96
III.4.5.	Level of bargaining and apparent elasticity between real wage and labour productivity, average EU27, 1995-2007	97
III.4.6.	Average number of social pacts concluded per year across EU27 countries)	98
III.A3.1.	Benchmark for real compensation per employee growth: labour productivity growth, EU15	104
III.A3.2.	Benchmark for real compensation per employee growth: labour productivity growth, New Member States	106
III.A3.3.	Benchmark for nominal compensation per employee growth: constant ULC-based REER, EU15	107
III.A3.4.	Benchmark for nominal compensation per employee growth: constant ULC-based REER, New Member States	108
III.A3.5.	Benchmark for nominal compensation per employee growth: prediction from wage equation, EU15	109
III.A3.6.	Benchmark for nominal compensation per employee growth: prediction from wage equation, New Member States	111
III.A3.7.	Unit labour cost, nominal compensation per employee and labour productivity indices EU15 (index numbers, 2000=100)	113
III.A3.8.	Unit labour cost, nominal compensation per employee and labour productivity indices New Member States (index numbers, 2000=100)	114
III.A3.9.	REER, price levels, real unit labour costs, EU15, (index numbers, 2000=100)	115
III.A3.10.	REER, price levels, real unit labour costs, New Member States, (index numbers, 2000=100)	116

LIST OF BOXES

I.1.1.	Changes in female participation rates and the added worker effect	11
I.1.2.	The steady-state unemployment rate and the Beveridge curve	17
I.2.1.	Regional unemployment in Spain and Italy	22
I.2.2.	Unemployment and migration	32
II.3.1.	Proposed trigger variables in the literature	74
II.3.2.	Unemployment benefits system in the US	75
III.3.1.	Are real wages growing in line with productivity sufficient to avoid price competitiveness losses?	87
