

# BIOMETRIKA VOL. 95, NO. 4

## CONTENTS

	PAGE
DRYDEN, I. L., KUME, A., LE, H. and WOOD, A. T. A. A multi-dimensional scaling approach to shape analysis . . . . .	779
COOK, R. D. and FORZANI, L. Covariance reducing models: An alternative to spectral modelling of covariance matrices . . . . .	799
LI, B., GENTON, M. G. and SHERMAN, M. Testing the covariance structure of multivariate random fields . . . . .	813
GUAN, Y. A goodness-of-fit test for inhomogeneous spatial Poisson processes . . . . .	831
LIN, P.-S. Estimating equations for spatially correlated data in multi-dimensional space . . . . .	847
DUNSON, D. B. and PEDDADA, S. D. Bayesian nonparametric inference on stochastic ordering . . . . .	859
TANG, R. and MÜLLER, H.-G. Pairwise curve synchronization for functional data . . . . .	875
QU, A., LEE, J. J. and LINDSAY, B. G. Model diagnostic tests for selecting informative correlation structure in correlated data . . . . .	891
ZHU, Z., FUNG, W. K. and HE, X. On the asymptotics of marginal regression splines with longitudinal data . . . . .	907
YBARRA, L. M. R. and LOHR, S. L. Small area estimation when auxiliary information is measured with error . . . . .	919
REITER, J. P. Multiple imputation when records used for imputation are not used or disseminated for analysis . . . . .	933
LI, Y., PRENTICE, R. L. and LIN, X. Semiparametric maximum likelihood estimation in normal transformation models for bivariate survival data . . . . .	947
LIANG, F. and ZHANG, J. Estimating the false discovery rate using the stochastic approximation algorithm . . . . .	961
 MISCELLANEA	
KUANG, D., NIELSEN, B. and NIELSEN, J. P. Identification of the age-period-cohort model and the extended chain-ladder model . . . . .	979
KUANG, D., NIELSEN, B. and NIELSEN, J. P. Forecasting with the age-period-cohort model and the extended chain-ladder model . . . . .	987
DE STAVOLA, B. L. and COX, D. R. On the consequences of overstratification . . . . .	992
OAKES, D. On consistency of Kendall's tau under censoring . . . . .	997
COX, D. R. On an internal method for deriving a summary measure . . . . .	1002
BEYERSMANN, J. and SCHUMACHER, M. A note on nonparametric quantile inference for competing risks and more complex multistate models . . . . .	1006
