Special Issue: Copper Mountain 2008

Volume 32, Number 1

Articles originally published online February 2010

## CONTENTS

- vii Special Issue: 2008 Copper Mountain Conference  
*Ray Tuminaro*
- 1 General Constrained Energy Minimization Interpolation Mappings for AMG  
*Panayot S. Vassilevski*
- 14 Towards Adaptive Smoothed Aggregation ( $\alpha$ SA) for Nonsymmetric Problems  
*M. Brezina, T. Manteuffel, S. McCormick, J. Ruge, and G. Sanders*
- 40 Smoothed Aggregation Multigrid for Markov Chains  
*H. De Sterck, T. A. Manteuffel, S. F. McCormick, K. Miller, J. Pearson, J. Ruge, and G. Sanders*
- 62 Finite Element Approach to Clustering of Multidimensional Time Series  
*Illia Horenko*
- 84 Adaptive Techniques for Improving the Performance of Incomplete Factorization Preconditioning  
*Anshul Gupta and Thomas George*
- 111 Adaptive Time-Stepping for Incompressible Flow Part II: Navier–Stokes Equations  
*David A. Kay, Philip M. Gresho, David F. Griffiths, and David J. Silvester*
- 129 Deflated and Restarted Symmetric Lanczos Methods for Eigenvalues and Linear Equations with Multiple Right-Hand Sides  
*Abdou M. Abdel-Rehim, Ronald B. Morgan, Dywayne A. Nicely, and Walter Wilcox*
- 150 Operator-Based Preconditioning of Stiff Hyperbolic Systems  
*Daniel R. Reynolds, Ravi Samtaney, and Carol S. Woodward*
- 171 An Iterative Method for Edge-Preserving MAP Estimation When Data-Noise Is Poisson  
*Johnathan M. Bardsley and John Golde*
- 186 The Cycle-Convergence of Restarted GMRES for Normal Matrices Is Sublinear  
*E. Vecharynski and J. Langou*
- 197 An Efficient Numerical Method for the Solution of the  $L_2$  Optimal Mass Transfer Problem  
*Eldad Haber, Tauseef Rehman, and Allen Tannenbaum*
- 212 Dynamically Adaptive Simulations with Minimal Memory Requirement—Solving the Shallow Water Equations Using Sierpinski Curves  
*Michael Bader, Christian Böck, Johannes Schwaiger, and Csaba Vigh*
- 229 First-Order System Least Squares for Incompressible Resistive Magnetohydrodynamics  
*J. H. Adler, T. A. Manteuffel, S. F. McCormick, and J. W. Ruge*
- 249 Preconditioning Saddle-Point Systems with Applications in Optimization  
*H. Sue Dollar, Nicholas I. M. Gould, Martin Stoll, and Andrew J. Wathen*
- 271 Optimal Solvers for PDE-Constrained Optimization  
*Tyrone Rees, H. Sue Dollar, and Andrew J. Wathen*
- 299 Multilevel Approach for Signal Restoration Problems with Toeplitz Matrices  
*Malena I. Español and Misha E. Kilmer*
- 320 Marker Redistancing/Level Set Method for High-Fidelity Implicit Interface Tracking  
*Robert Nourgaliev, Samet Kadioglu, and Vincent Mousseau*
- 349 An Inner-Outer Iteration for Computing PageRank  
*David F. Gleich, Andrew P. Gray, Chen Greif, and Tracy Lau*
- 372 Iterative Solvers for the Stochastic Finite Element Method  
*Eveline Rosseel and Stefan Vandewalle*

Continued on inside back cover

*Continued from back cover*

398

**Least-Squares Finite Element Methods for Quantum Electrodynamics**  
*J. Brannick, C. Ketelsen, T. Manteuffel, and S. McCormick*

418

**A Fully Implicit Domain Decomposition Algorithm for Shallow Water Equations on the Cubed-Sphere**  
*Chao Yang, Jianwen Cao, and Xiao-Chuan Cai*

439

**Computing and Deflating Eigenvalues While Solving Multiple Right-Hand Side Linear Systems with an Application to Quantum Chromodynamics**  
*Andreas Stathopoulos and Konstantinos Orginos*

463

**The Iterative Solver RISOLV with Application to the Exterior Helmholtz Problem**  
*Hillel Tal-Ezer and Eli Turkel*
