

Scientific Computing

Volume 32, Number 2

Articles originally published online February 2010 to March 2010

CONTENTS

- 477 Discrete-Ordinate Discontinuous Galerkin Methods for Solving the Radiative Transfer Equation
Weimin Han, Jianguo Huang, and Joseph A. Eichholz
- 498 Accelerated A Posteriori Error Estimation for the Reduced Basis Method with Application to 3D Electromagnetic Scattering Problems
Jan Pomplun and Frank Schmidt
- 521 A Preconditioner for the Finite Element Approximation to the Arbitrary Lagrangian–Eulerian Navier–Stokes Equations
David Nordsletten, Nicolas Smith, and David Kay
- 544 Algebraic Multigrid for Markov Chains
H. De Sterck, T. A. Manteuffel, S. F. McCormick, K. Miller, J. Ruge, and G. Sanders
- 563 Solution of Sturm–Liouville Problems Using Modified Neumann Schemes
Veerle Ledoux and Marnix Van Daele
- 585 Fast Evaluation of Volume Potentials in Boundary Element Methods
G. Of, O. Steinbach, and P. Urthaler
- 603 Fluid Solver Independent Hybrid Methods for Multiscale Kinetic Equations
Giacomo Dimarco and Lorenzo Pareschi
- 635 Coupling Algorithms for Calculating Sensitivities of Smoluchowski’s Coagulation Equation
Peter L. W. Man, James R. Norris, Ismaël F. Bailleul, and Markus Kraft
- 656 On Two-Dimensional Sparse Matrix Partitioning: Models, Methods, and a Recipe
Ümit V. Çatalyürek, Cevdet Aykanat, and Bora Uçar
- 684 The Domain Decomposition Method for Maxwell’s Equations in Time Domain Simulations with Dispersive Metallic Media
Jong Hyuk Park and John C. Strikwerda
- 703 A Note on Moment Preservation of Finite Volume Schemes for Solving Growth and Aggregation Population Balance Equations
Jitendra Kumar and Gerald Warnecke
- 714 A Refined Harmonic Lanczos Bidiagonalization Method and an Implicitly Restarted Algorithm for Computing the Smallest Singular Triplets of Large Matrices
Zhongxiao Jia and Datian Niu
- 745 A Framework for Reduced Order Modeling with Mixed Moment Matching and Peak Error Objectives
Keith R. Santarelli
- 774 Shift-Invert Arnoldi Approximation to the Toeplitz Matrix Exponential
Spike T. Lee, Hong-Kui Pang, and Hai-Wei Sun
- 793 A Certified Reduced Basis Method for the Fokker–Planck Equation of Dilute Polymeric Fluids: FENE Dumbbells in Extensional Flow
David J. Knezevic and Anthony T. Patera
- 818 Parallel High-Order Integrators
Andrew J. Christlieb, Colin B. Macdonald, and Benjamin W. Ong
- 836 New Algorithms for Optimal Online Checkpointing
Philipp Stumm and Andrea Walther
- 855 A New Divergence-Free Interpolation Operator with Applications to the Darcy–Stokes–Brinkman Equations
Xuejun Xu and Shangyou Zhang

Continued on inside back cover

Continued from back cover

- 875 **A Mimetic Discretization of the Stokes Problem with Selected Edge Bubbles**
L. Beirão da Veiga and K. Lipnikov
- 894 **Asymptotic Imaging of Perfectly Conducting Cracks**
Habib Ammari, Hyeonbae Kang, Hyundae Lee, and Won-Kwang Park
- 923 **A Kronecker Product Preconditioner for Stochastic Galerkin Finite Element Discretizations**
Elisabeth Ullmann
- 947 **Local Orthogonal Cutting Method for Computing Medial Curves and Its Biomedical Applications**
Xiangmin Jiao, Daniel R. Einstein, and Vladimir Dyedov
- 970 **Certified Reduced Basis Methods and Output Bounds for the Harmonic Maxwell's Equations**
Yanlai Chen, Jan S. Hesthaven, Yvon Maday, and Jerónimo Rodríguez
- 997 **Reduced Basis Method and A Posteriori Error Estimation for Parametrized Linear-Quadratic Optimal Control Problems**
Luca Dedè
- 1020 **An Adaptive Finite Element Method for the Eddy Current Model with Circuit/Field Couplings**
Junqing Chen, Zhiming Chen, Tao Cui, and Lin-Bo Zhang
- 1043 **A Multilevel Algorithm for Simultaneously Denoising and Deblurring Images**
Raymond H. Chan and Ke Chen
- 1064 **Goal-Oriented Error Estimation and Adaptivity for Free-Boundary Problems: The Domain-Map Linearization Approach**
K. G. van der Zee, E. H. van Brummelen, and R. de Borst
- 1093 **Goal-Oriented Error Estimation and Adaptivity for Free-Boundary Problems: The Shape-Linearization Approach**
K. G. van der Zee, E. H. van Brummelen, and R. de Borst
