

TEST

INVITED PAPER

- 211 T. Gneiting • L.I. Stanberry • E.P. Gritti • L. Held • N.A. Johnson
Assessing probabilistic forecasts of multivariate quantities, with an application to ensemble predictions of surface winds

DISCUSSION

- 236 J.M. Angulo • M.D. Ruiz-Medina (comment)
238 P.J. Bickel (comment)
240 W.M. Briggs (comment)
243 A.P. Dawid (comment)
245 M. Fuentes (comment)
249 I.T. Jolliffe (comment)
251 R.L. Winkler • V.R.R. Jose (comment)
256 T. Gneiting • L.I. Stanberry • E.P. Gritti • L. Held • N.A. Johnson (rejoinder)

ORIGINAL PAPERS

- 265 M. Molina • C. Jacob • A. Ramos
Bisexual branching processes with offspring and mating depending on the number of couples in the population
- 282 A.D. Akkaya • M.L. Tiku
Short-tailed distributions and inliers
- 297 E. Belzunce • A.K. Nanda • E.-M. Ortega • J.M. Ruiz
Generalized orderings of excess lifetimes of renewal processes
- 311 J. Diebolt • L. Gardes • S. Girard • A. Guillou
Bias-reduced estimators of the Weibull tail-coefficient
- 332 F. Autin
Maxisets for μ -thresholding rules
- 350 A. García-Pérez
Approximations for F -tests which are ratios of sums of squares of independent variables with a model close to the normal
- 370 N. Loperfido
Modeling maxima of longitudinal contralateral observations
- 381 A.K. Fermín • C. Ludeña
A statistical view of iterative methods for linear inverse problems
- 401 I. Van Keilegom • W. González Manteiga • C. Sánchez Sellero
Goodness-of-fit tests in parametric regression based on the estimation of the error distribution
