Number 2
August 2009

TEST

INVITED PAPER

- 213 G. Claeskens • J.D. Hart
Goodness-of-fit tests in mixed models

DISCUSSION

- 240 A. Cabaña (comment)
244 I. Molina (comment)
248 J. Jiang • T. Nguyen (comment)
256 A. Munk • T. Krivobokova (comment)
260 O. Thas (comment)
265 G. Claeskens • J.D. Hart (rejoinder)

ORIGINAL PAPERS

- 271 R. Mukerjee • L.-Y. Chan
Confidence intervals based on empirical statistics: existence of a probability matching prior and connection with frequentist Bartlett adjustability
- 283 E. del Barrio • A. Janssen • C. Matrán
On the low intensity bootstrap for triangular arrays of independent identically distributed random variables
- 302 D. Balding • P.A. Ferrari • R. Fraiman • M. Sued
Limit theorems for sequences of random trees
- 316 S. Lee • J. Song
Minimum density power divergence estimator for GARCH models
- 342 M.D. Ugarte • A.F. Militino • T. Goicoa
Benchmarked estimates in small areas using linear mixed models with restrictions
- 365 T.P. Hui • R. Modarres • G. Zheng
Pseudo maximum likelihood estimates using ranked set sampling with applications to estimating correlation
- 381 T. Otsu
RESET for quantile regression
- 392 F. Caeiro • M.I. Gomes
Semi-parametric second-order reduced-bias high quantile estimation
